## **WESTFIELD GROUP CONFIRMS NEW DEPARTMENT STORE DEALS IN AUSTRALIA AND NEW DEVELOPMENT COMMENCEMENTS GLOBALLY**

The Westfield Group (ASX: WDC) today confirmed that David Jones will open three new department stores at Westfield Burwood in Sydney, Westfield Chermside in Brisbane, and Westfield Doncaster in Melbourne.

Two new stores will be developed, one of which will form part of the expansion currently underway at Chermside and the other at the future expansion planned for Doncaster. This will complete the super regional offering of two department stores in both centres. The new store at Burwood will be introduced into the existing space currently occupied by Myer. This is expected to take place in the first half of next year.

- The current \$180 million expansion at Chermside will open in October 2006 with David Jones opening in August 2007. Upon completion, Chermside will be the largest shopping centre in Brisbane. Since acquiring Chermside in 1996 for \$127 million, the Group will have spent approximately \$420 million on further development with the centre expected to be valued on completion at in excess of \$1 billion. This equates to a total increase in capital value of over \$450 million.
- The \$400 million redevelopment planned for Doncaster is due to commence in early 2007 and is set to almost double the size of the existing centre. The addition of David Jones to the project, together with the existing Myer store, will reposition Doncaster as one of the premier fashion destinations in Melbourne.
- The opening of David Jones in Burwood will reposition the shopping centre to be better aligned with its growing affluent Inner-West Sydney demographic.

"We are very pleased to announce these deals which sees the introduction of a strong performing retailer like David Jones, further enhancing the quality of our centres in the Australian portfolio", said Australian Managing Director, Robert Jordan.

In addition to the recent announcement regarding Westfield Group's acquisition of the Stratford development site in East London, a further four major redevelopments have now commenced across the Group's global portfolio:

- US\$220 million expansion at Westfield Galleria at Roseville in Sacramento, California;
- US\$80 million expansion at Westfield Plaza Bonita, in San Diego, California;
- A\$160 million redevelopment at Westfield Kotara, in Newcastle, New South Wales; and
- NZ\$210 million 'greenfield' development at Albany in Auckland, New Zealand, the Group's largest development in New Zealand to date.

**MEDIA RELEASE**

"The Group continues to focus on expanding and redeveloping its centres globally which is both earnings accretive and delivers strong underlying capital growth", said Group Managing Director, Steven Lowy.

Redevelopment projects are expected to generate average initial income yields on cost in the range of 9-10% with unleveraged internal rates of return of approximately 14%.

The new projects announced add to the existing A\$7.0 billion of projects currently underway across the Group and form part of the A\$1.5 - A\$2.0 billion of new project commencements scheduled for the 2006 year.

## **WESTFIELD TO CONTROL 100% OF STRATFORD CITY, MAJOR EAST LONDON REGENERATION PROJECT**

The Westfield Group (WDC:ASX) today announced it had acquired from its co-owners, the 75% interest in the Stratford City development in east London which it did not already own. The interest was acquired for approximately £140 million.

Westfield has reached binding agreements with companies associated with David and Simon Reuben and Multiplex Group to acquire their combined 50% interest, and with Stanhope Limited to acquire its 25% interest.

Westfield Group acquired its initial 25% interest in Stratford City Developments Limited as part of the Duelguide/Chelsfield acquisition in December 2004.

Stratford City is adjacent to the site for the 2012 London Olympic Games. Much of the Olympic Village will be developed on part of the Stratford City site and will then be available for residential occupation.

The site has planning approval for 13 million square feet of mixed use development, including 2 million square feet of retail.

Westfield said it was pleased that the satisfactory resolution of the shareholding arrangements for the Stratford project would allow it to make a positive contribution to the timely delivery of an important element of the Olympic site, and carry forward the important regeneration of Stratford City.

Westfield acknowledged the difficult decision that was required from its fellow shareholders in Stratford City to exit the project for the good of the scheme and the London 2012 Olympics.

Westfield said it looked forward to working closely with the relevant authorities, including the Olympic Delivery Authority, LCR, the GLA and the London Borough of Newham to develop a high quality super regional shopping centre and to participate in the other mixed use components on the site.

# **Westfield Group**

Supplemental Disclosure Report

Year Ended December 31, 2005

## **Overview of the Westfield Group**

The Westfield Group is the world's largest listed retail property group and the seventh largest entity listed on the Australian Stock Exchange, in each case, based on an A\$31.6 billion (US\$23.2 billion) equity market capitalisation at December 31, 2005.

The Westfield Group's property investment portfolio at December 31, 2005 consisted of interests in 128 shopping centres located in Australia, New Zealand, the United States and the United Kingdom, with a gross value of approximately A\$52.5 billion (US\$38.5 billion) and comprised of approximately 10.6 million square metres (114.0 million square feet) of gross leaseable area ("GLA"). The properties that the Westfield Group owns or manages currently contain 22,500 retail outlets and at December 31, 2005, the Group had total assets (comprising shopping centre and other assets) of A\$43.0 billion (US\$31.5 billion).

The Westfield Group is an internally managed, vertically integrated shopping centre group. It operates in the following business operations:

- shopping centre ownership;
- property management and leasing;
- property development, design and construction; and
- funds and asset management.

Notwithstanding the merger transaction that occurred in June 2004, the Westfield Group continues to conduct all of its operations through Westfield Holdings Limited, Westfield Trust and Westfield America Trust and their respective subsidiaries. Although these entities continue to exist as separate legal entities they now operate as a coordinated economic group, with a common public investor base, common business objectives and a common membership of their boards of directors.

## **Business Operations**

### ***Shopping Centre Ownership***

The Westfield Group's shopping centres are geographically diverse, spread across five states and 1 territory in Australia and 14 states in the United States, as well as in New Zealand and the United Kingdom. The Westfield Group's size and geographic diversity significantly reduce its dependence upon any single tenant or property. The Group's shopping centres are generally located near or in major metropolitan areas, anchored by long-term tenancies with major retailers and incorporate a wide cross section of specialty retailers and national chain store operators. The Group's shopping centre investments are undertaken on both a wholly owned basis and through joint ventures, primarily with major institutional investors.

- ***United States***

In the United States, at December 31, 2005 the Westfield Group owned interests in and managed 67 shopping centres, comprising approximately 6.6 million square metres (70.9 million square feet) of GLA. The portfolio was 95.1% leased at December 31, 2005. Of the 67 properties, 56 properties are wholly owned and 11 are held through joint ventures or co-ownership agreements. At December 31, 2005, the gross value of these real estate assets was US\$16.9 billion, of which the book value of the Westfield Group's proportionate interest was US\$13.9 billion. In addition the Group manages nine U.S. airport concessions.

- *Australia and New Zealand*

In Australia and New Zealand, at December 31, 2005, the Westfield Group had interests in 54 shopping centres, comprising approximately 3.7 million square metres (39.8 million square feet) of GLA with a portfolio occupancy level in excess of 99.5%. Of these 54 properties, 43 properties are located in Australia and 11 centres located in New Zealand. At 31 December the gross value of the Australian and New Zealand portfolios was A\$20.4 billion and NZ\$2.2 billion respectively with 29 properties wholly owned, 24 properties held through joint ventures or co-ownership agreements, and one property held through a participating ground lease or head lease arrangement. The Westfield Group manages 48 of the 54 shopping centres.

- *United Kingdom*

In the United Kingdom, at December 31, 2005, the Westfield Group owned interests in and managed seven shopping centres, comprising approximately 0.3 million square metres (3.3 million square feet) of GLA with a portfolio occupancy rate of more than 99%. Five of these properties are held through joint ventures with two being wholly owned. At December 31, 2005, the gross value of these seven properties was £3.0 billion.

### ***Property Management and Leasing***

Property management involves leasing and day-to-day management and marketing of the Westfield Group's shopping centre portfolio and other properties. The Group's shopping centres are designed to provide an efficient and dynamic environment for retailers and a quality shopping experience for consumers, creating a platform for the Westfield Group's retailers to enhance their performance and for the Group to maximize its returns. The Group works to build and maintain long-term relationships with its retailers in addition to developing strong relationships with consumers by supporting the local communities of its shopping centres and through various marketing activities.

### ***Property Development, Design and Construction***

The Westfield Group's property development activities are vertically integrated and involve the development, design, construction and initial leasing of shopping centres, primarily for properties that it owns and manages. These activities include purchasing land, obtaining approvals from regulatory authorities, conducting negotiations with major retailers, preparing feasibility studies and acting as architect, project manager and general contractor for each shopping centre development and redevelopment project. The Group's redevelopment projects are designed to maximise returns on investment from both increased rental income and capital appreciation of the asset.

The Westfield Group currently has a significant development program with 18 projects underway at an investment of A\$6.8 billion, with Westfield's share being A\$4.6 billion as at December 31, 2005. The Group expects to commence A\$1.5 to 2.0 billion of redevelopment projects from the current portfolio in each of the next three years. These projects are expected to generate initial income yields on project cost in the range of 9-10%, with unleveraged internal rates of return of approximately 14%.

- *United States*

During the 12 months to December 2005, the Group completed the US\$120 million redevelopment of Westfield Franklin Park in Toledo, Ohio, the US\$140 million redevelopment of Westfield Wheaton in Wheaton, Maryland and a US\$30 million project at Gateway in Lincoln, Nebraska. In Australia there are 3 major projects currently under construction at a forecast project cost of approximately A\$490 million and are all scheduled to complete in 2006. In Sydney, the A\$109 million redevelopment of Westfield Parramatta, is forecast for completion by the second quarter of 2006 and the A\$200 million redevelopment of Westfield Liverpool is due to open by Christmas 2006. The White City project is scheduled for completion in the first half of 2008 with Westfield's share being approximately UK£900 million.

### ***Funds and Asset Management***

The Westfield Group manages certain assets on behalf of institutional and other investors for which it receives management fees. The Group generally undertakes these activities on a joint venture basis. In addition, it manages Carindale Property Trust, which is an Australian publicly listed property trust that owns a 50% interest in the Westfield Carindale centre in Brisbane, Australia.

The following sets out a review of operations in the each of the Group's main regions of the United States, Australia and New Zealand and the United Kingdom for the 12 months ended December 31, 2005.

## United States Operations

All areas are quoted in square feet and all amounts are in U.S. Dollars.

Specialty Stores include Mini-Majors (retail stores generally occupying between 20,000 and 80,000 square feet of leasable space and theaters), Specialty Shops (retail stores occupying less than 20,000 square feet of leasable space) and free standing buildings outside a centre in the parking areas.

The Group also owns 12 department store properties (the "May Properties") that are net leased to the May Department Stores Company (the "May Company"), including two that are located at the Company's Centres. In August 2005, Federated Department Stores, Inc. ("Federated") completed its merger with the May Company. As a result of the merger, Federated announced plans to divest certain duplicate stores. In February 2006, the Company agreed to exchange its May Properties for 12 department store sites owned by Federated and to acquire three additional stores from Federated in a separate transaction. All 15 stores to be acquired are located at the Group's Centres.

- (1) In connection with the August 2005 merger of Federated with the May Company, Federated has announced plans to divest certain duplicate stores and the Lord & Taylor division prior to the end of 2006, and to concentrate on building its Macy's and Bloomingdale's brands which will result in the renaming of many of its stores. In February 2006, the Group agreed to acquire 15 department store sites at its Centres from Federated in separate exchange and purchase transactions.
- (2) In March 2006, Saks Incorporated announced the completion of the sale of its Northern Department Store Group, which includes the Carson Pirie Scott and Youngers stores, to The Bon-Ton Stores, Inc.
- (3) In September and December of 2005, the Group acquired five stores from Mervyn's and has leased them back to Mervyn's. Mervyn's closed one of these stores in January 2006.

## Specialty Stores

During 2005, the five Specialty Store retailers accounting for the largest percentage of Specialty Stores' effective rent (i.e., base rent plus percentage rent) were: Limited Brands (The Limited, Express, Bath & Body Works, Victoria's Secret and others), Gap Inc (The Gap, Gap Kids, Baby Gap, Banana Republic and Old Navy), Foot Locker, Inc. (Foot Locker, Lady Foot Locker and other), Abercrombie & Fitch Co. (Abercrombie & Fitch, Abercrombie, Hollister and Ruehl) and Zale Corporation (Zales Jewelers, Gordon's Jewelers and Bailey Banks and Biddle).

The following table sets forth certain information with respect to the ten largest Specialty Store retailers (through their various operating divisions) in terms of Specialty GLA, as of December 31, 2005:

## Sales

Total sales for Specialty Shops affect revenue and profitability levels of the Group because they determine the amount of minimum rent the Group can charge, the percentage rent it realizes, and the recoverable expenses (common area maintenance, real estate taxes, etc.) the retailers can afford to pay.

The table below sets forth total Specialty Shops sales for Centres in the east coast, midwest and west coast regions of the United States:

| Year      | East Coast       |                     | Midwest          |                     | West Coast       |                     | Total            |                     |

Reported sales per square foot for Specialty Shops were as follows:

|  | 2005  | 2004  | 2003  |
|--|-------|-------|-------|
| Reported sales per square foot.....                                  | \$424 | \$405 | \$384 |
| Increase from prior year .....                                       | 4.7%  | 5.5%  | 2.4%  |
| Increase from prior year on a comparable Specialty Shops basis ..... | 5.2%  | 6.1%  | 1.8%  |

The Group believes these sales levels enhance its ability to obtain higher rents from retailers.

## Leasing

Leasing percentages are calculated on the basis of signed leases, excluding temporary leases which have a term of less than one year. The following table sets forth leased status for Centres in the east coast, midwest and west coast regions of the United States:

| <u>At December 31,</u>    | <u>East Coast</u> | <u>Midwest</u> | <u>West Coast</u> | <u>Total</u> |

| 2004 .....                | 94.7%             | 90.3%          | 97.1%             | 94.2%        |
| 2003 .....                | 93.6%             | 90.7%          | 95.7%             | 93.6%        |

<sup>(1)</sup> Excludes Westfield Sunrise which was acquired in the second half. Including Sunrise, the East Coast and Total would have been 93.4% and 94.6%, respectively.

The following table sets forth base rents and expense recoveries as a percentage of sales for reporting Specialty Shop retailers:

## Leases

Generally, Specialty Store leases are for ten-year terms and provide for retailers to pay rent comprised of fixed and variable components. The fixed component, referred to as "base" or "minimum" rent, is often subject to steps, or contractual increases according to a negotiated schedule. The variable rent component is based upon a percentage of a retailer's gross sales in excess of a minimum annual amount. In some cases, retailers only pay base rent or percentage rent.

Virtually all of the leases for Specialty Stores contain provisions that allow the Centres to recover certain operating costs and expenses (including certain capital expenditures) with respect to the common areas (including parking facilities), all buildings, roofs and facilities within the Centres, as well as insurance and property taxes.

## Lease Expirations

The expiration of leases present shopping centre owners with the opportunity to increase base and percentage rents, modify lease terms, improve retailer mix, relocate existing retailers, reconfigure or expand retailer spaces and introduce new retailers and retail concepts to the shopping centre. The Group endeavors to increase base rent levels in the Centres in part through negotiating terminations of leases of underperforming retailers and renegotiating expired leases.

The following table shows scheduled lease expirations over the next ten years based upon Specialty Store leases in place at December 31, 2005:

| Year Ending December 31, | Number of Leases Expiring | Specialty Store GLA of Expiring Leases (Sq. ## Specialty Shop Rental Rates

The following table contains average base and effective rent (base rent plus percentage rent) on a per square foot basis of the Specialty Shops:

| <u>As of December 31,</u> | <u>Base Rent</u> | <u>Effective Rent</u> |
|---------------------------|------------------|-----------------------|
| 2005 .....                | \$38.83          | \$39.68               |
| 2004 .....                | \$37.88          | \$38.77               |
| 2003 .....                | \$36.31          | \$36.99               |

As leases have expired, the Group has generally sought to rent the available space, either to the existing retailer or a new retailer, at rental rates that are higher than those of the expiring leases, since the average rent for leases in place is generally less than the market rate for such space.

The following table illustrates increases in Specialty Shop rental rates:

| <u>Year</u> | <u>Leases Executed During the Period<sup>(1)</sup></u> | <u>Leases Expiring During the Period<sup>(2)</sup></u> | <u>Percent Increase</u> |
|-------------|--|--|-------------------------|
| 2005 .....  | \$42.79  | \$33.29  | 28.5%                   |
| 2004 .....  | \$42.27  | \$33.47  | 26.3%                   |
| 2003 .....  | \$42.26  | \$33.03  | 27.9%                   |

<sup>(1)</sup> Represents average base rent for the initial year of occupancy including renewals.

<sup>(2)</sup> Represents average base rent for the final year of occupancy and includes scheduled expirations, early terminations, abandonments and negotiated buyouts.

Minimum rents at Specialty Shops are expected to grow as a result of contractual rent increases in existing leases. Although there can be no assurances that such contractual increases will be realized, or that contractual increases are indicative of possible future increases, base rent at the Centres is expected to increase by approximately \$47.5 million over the next five years through these contractual increases.

Under generally accepted accounting principles ("GAAP"), contractual rent increases are recognised as rental income using the straight line method over the respective lease term which may result in the recognition of income not currently billable under the terms of the lease. The amount of contractual rent recognized for GAAP purposes in excess of rent billed for the years ended December 31, 2005, 2004, and 2003 was \$14.3 million, \$14.5 million and \$12.9 million, respectively.

### Seasonality

The shopping centre industry is seasonal in nature, particularly in the fourth quarter during the holiday season, when retailer occupancy and retail sales are typically at their highest levels. In addition, shopping centres achieve a substantial portion of their specialty (temporary retailer) rents during the holiday season. As a result of the above, earnings are generally highest in the fourth quarter of each year.

The following table summarizes Specialty Shop Sales by quarter and Percentage Leased at quarter end:

### United Kingdom Operations

(all area quoted in square metres)

Sales data is not currently collected for all of our United Kingdom retailers as it is not a requirement under a number of existing leases in the portfolio. As leases are renewed however, we are amending the terms to reflect the provision of sales data as a condition of the lease.

- 2.3 If, under the Compliance Plan, a member of the Board or a member of the Compliance Committee is required to perform any act or ensure that any act is done, that member may delegate the actual performance of that function to a person who has been formally appointed as such member's alternate in accordance with any applicable requirements of the Compliance Plan or Westfield's Constitution, but must continue to monitor the performance of that function by the delegate to ensure that the act is performed in accordance with any applicable requirements of the Compliance Plan.

## **PART 3 - THE COMPLIANCE COMMITTEE**

### ***Role and Function in the Compliance Process***

- 3.1 The Compliance Committee is responsible for monitoring Westfield's compliance with the Compliance Plan and report on its findings to the Board.

### ***Appointment of Members of the Compliance Committee***

- 3.2 Members of the Compliance Committee will be selected following a review by the Board of the proposed member's skill, experience and capacity to meet Westfield's requirements and carry out the functions in accordance with any applicable requirements of the Compliance Plan, the Corporations Act and ASIC Policies including, in the case of external members of the Compliance Committee, that they are qualified to act as external members for the purposes of the Corporations Act. The appointment of a member of the Compliance Committee must be approved by the Board.
- 3.3 Members of the Compliance Committee who are external members must immediately notify the Compliance Committee and the Board if they cease to be qualified to act as external members for the purposes of the Corporations Act.
- 3.4 The Group Compliance Officer is responsible for obtaining confirmation at least once a year from each of the external members of the Compliance Committee on whether they continue to be qualified to act as external members for the purposes of the Corporations Act.

### ***Minimum Number of Members***

- 3.5 Westfield must ensure that the Compliance Committee has at least three members at all times. The majority of them must be external members.

### ***Service Agreements for External Members***

- 3.6 Each external member of the Compliance Committee must enter into a service agreement with Westfield dealing with relevant matters such as their appointment and removal, indemnification, insurance and remuneration. The terms of the service agreement must be consistent with the Compliance Plan.

### ***Term of Office***

- 3.7 Westfield may remove a member from the Compliance Committee by notice to that member. At least 14 days' notice must be given unless Westfield considers the removal of a member of the Compliance Committee on shorter notice to be in the best interests of Members or (subject to the terms of the member's appointment) the member is in breach of the terms of their appointment.
- 3.8 A member of the Compliance Committee may retire on two months' notice to Westfield, or any shorter notice period as Westfield agrees.

### ***Alternate Members***

- 3.9 A member of the Compliance Committee may nominate an alternate. If the member is an external member, the alternate must qualify as an external member. Any alternate must be acceptable to Westfield.

***Terms of Reference***

- 3.10 Westfield may develop other documents and systems (such as a Compliance Committee charter) to set out in greater detail the procedures the Compliance Committee must follow, and may amend such documents and systems from time to time. These other documents and systems operate alongside, but do not form part of, the Compliance Plan.

***Frequency of Meetings***

- 3.11 The Compliance Committee must meet at least four times per annum, unless the members of the Compliance Committee agree it is not necessary or desirable for a particular meeting to be held.

***Technology***

- 3.13 A meeting of the Compliance Committee may be held using telephone conference or video conference facilities or any combination thereof, or any other technology agreed to by all the members of the Compliance Committee. A resolution in writing signed by all members of the Compliance Committee is as valid and effective as if it had been passed at a meeting of members of the Compliance Committee. A written resolution may consist of several documents in like form, each signed by one or more members.

***Quorum***

- 3.14 The quorum for a meeting of the Compliance Committee is two members, at least one of whom must be an external member. If a quorum is not present within 15 minutes after the appointed time, the meeting is adjourned to a place and time that the members present decide. They must tell the other members of the time and place. At any adjourned meeting, those members present constitute a quorum, provided that the number of external members present is at least equal to the number of other members present.

***Chairman***

- 3.15 Westfield may appoint a Chairman for a meeting or for a term, and may terminate that appointment at any time. If no Chairman is so appointed or present at a meeting, the members of the Compliance Committee present may elect a Chairman for the meeting. Any Chairman must be a member of the Compliance Committee.
- 3.16 The Chairman may determine how a meeting will be conducted. The decision of the Chairman on any matter relating to the conduct of a meeting is final.

***Adjournment***

- 3.17 The Compliance Committee may adjourn a meeting for any reason to a place and time it considers appropriate.

***Voting***

- 3.18 Voting at a Compliance Committee meeting is by simple majority. The Chairman does not have a casting vote. If there is an equality of votes on a proposed resolution, that resolution will be taken to have been resolved in the negative. **CHECK AGAINST DELIVERY**

I trust that by now you have had an opportunity to look at the 2005 Annual Report which you will have received over the past few weeks.

That was our first report on a full year of operations since the merger of Westfield Holdings, Westfield Trust and Westfield America Trust in July 2004.

As the report noted, net profit for the year was \$4.2 billion and distributions to security holders totalled \$1.8 billion, or 106.57 cents per security. This was in line with our forecasts.

Total returns to security holders were 16.8% for the year – well ahead of the Property Trust Index total return of 12.5%.

Westfield has always been a growth company and the merger was all about creating a better platform to make the most of global opportunities.

We achieve our growth in three main ways.

Firstly, through the redevelopment of existing shopping centres, which has consistently generated a better return on the capital invested than would necessarily come from the acquisition of new centres in the current environment. And the scale of our redevelopment workload is unique to our company.

Secondly, we build new centres, these days usually in highly urbanised environments which generate high growth, like the new projects in London and in San Francisco.

Thirdly, by acquiring centres where they can add value by improving them through redevelopment and applying Westfield's branding and intensive management of the asset.

We are continually working hard on all three fronts and I'm pleased to report that since the merger the value of Westfield Group's shopping centre portfolio has grown by nearly 46% - from \$36 billion to \$52.5 billion. In 2005 growth was over 25%.

The growth in 2005 was driven by the acquisition of \$2.8 billion of shopping centres, \$3.4 billion of redevelopments and upward revaluations of \$3.9 billion from the Group's existing portfolio.

When the merger proposal was first announced, the combined market capitalisation of Westfield Holdings, Westfield Trust and Westfield America Trust was \$22 billion. At 31 December 2005, the market cap of Westfield Group was \$31.6 billion – a 44% increase.

Today, we have a portfolio of 128 shopping centres, with 22,500 retail outlets, in four countries.

The Group's portfolio value is located 44% in the US; 43% in Australia and New Zealand; and 13% in the United Kingdom.

61% of our net property income is now generated off-shore.

During 2005 the Group continued to perform well at an operating level in all markets. Leasing is strong, with occupancy close to 100% in Australia, New Zealand and the United Kingdom and 95.1% in the US, which is almost 1% ahead of the same time last year.

Our regional portfolios delivered comparable net operating income growth of 5.3% in Australia and New Zealand, 3.6% in the United States and 6.6% in the United Kingdom.

But statistics alone don't adequately describe the scale, strength and profile of our global portfolio.

They don't speak about the quality of the projects we're undertaking, or the enormous potential they have to showcase our skills and promote the Westfield brand's reputation for excellence in retail development.

The fact is that Westfield Group today is at the forefront of retail development in some of the most competitive markets in the world.

In Los Angeles, Chicago, San Francisco, London, and right here in Sydney – we are designing and building centres that are redefining the shopping centre industry. They are giving a new meaning to what centres look like, and what they offer.

There is a premium on quality. Better design, better finishes, better amenities. It's light years ahead of where we were even a decade ago.

It's a matter of great personal pride to me that Westfield is leading this change in our industry.

Of course, I was there at the beginning and I could never have foreseen the fantastic product we are now producing. Bondi Junction is a great example.

The place is alive, and there's something for everyone.

Shoppers have access to the very best retailers.

There are restaurants, cinemas and plenty of activities for families and children.

And what we've done at Bondi Junction is now being taken to even higher levels in other locations.

In Los Angeles, we'll soon finish the redevelopment of the Century City centre which offers traditional fashion retailing and new lifestyle and entertainment concepts, as well as high-end retailers not usually seen in traditional shopping centres.

Later this year we'll complete the redevelopment of the San Francisco centre in the heart of that city. This has been a unique and very sensitive project, bringing

together modern architecture with the historic elements of a famous landmark location, the most notable feature being a massive glass and steel dome, built in 1908, which will be fully restored to its original glory.

On the west side of London, the £1.5 billion White City project will result in the largest shopping centre in Greater London and at its scheduled completion in 2008 will be a fantastic beacon for the Westfield brand in the UK which is becoming an increasingly important market for the Group.

And in Sydney we have plans before the City Council to totally transform the disjointed and outdated Centrepunt, Imperial Arcade and Skygarden centres into one, integrated shopping centre.

Sydney is our home town and we are determined to deliver for Sydney the world-class retail centre it deserves.

It's difficult to describe the impact projects like these are having on these world cities.

They are transforming retail for the better, giving retailers a fantastic platform to grow their businesses.

They generate a multiplier effect that contributes jobs and economic growth many times that created by the initial investment.

And, ultimately, they are giving shoppers what they want – a wonderful environment in which to shop, and enjoy time with their families.

Of course, the projects I just mentioned are not the only projects the Group is involved in. At present there are 40 major projects in development planning stages across the Group and we expect to start \$1.5 to \$2 billion of projects each year for the next three years.

The importance of redevelopment cannot be overstated. As you know, redevelopment has been fundamental to our business model for more than 40 years.

Regional shopping centres as an asset class require constant management and reinvestment of capital to remain modern and relevant to retailers and consumers, and Westfield has continually refined and improved that skill over the years and provided a great return on the reinvested capital.

With property prices being as high as they are right now, the returns from redevelopment of centres in our existing portfolio are generally far better than we can achieve through acquisitions. We need to be, and we are, very selective about the opportunities we pursue. It is clear that our redevelopment pipeline will be the engine for superior growth in the current environment.

We have reached the position in recent years where we have been able to create sustainable growth through a program of redevelopment of the centres in our portfolio.

This self-sustaining business model will allow us to generate steady growth in operational earnings. This growth in earnings comes from the underlying growth in property income from the existing portfolio as well as the increased property income from the completed redevelopments.

Ladies and gentlemen, you can see from what I've said about our global business, and our position as the world's largest listed retail property group by market capitalisation, that we need the very best executives to maintain that position and continue to improve.

It has become a cliché in business circles to say that "our people are our most important asset."

In Westfield's case it has never been a truer statement than it is now.

Our industry is incredibly competitive, and very complex.

It takes years for executives to build a deep knowledge of the business, the subtleties of the various markets, and how the global picture fits together.

They must have an enormous appetite for hard work and the intellectual capacity to cope with a rapidly changing environment.

People with these attributes are the lifeblood of Westfield.

This is why we have always taken care to nurture our management team and give them every opportunity to continue to learn and grow in the job.

I'm proud to say that many of our senior executive team today started with the company 10, 15 and 20 years ago in relatively junior positions.

We now have about 30 senior executives working outside their home country which gives us the ability to transfer knowledge and the Westfield culture from market to market.

This group of long-term Westfield executives has been strengthened with the recruitment of new executives, especially over the past five years or so.

This has given us a very effective combination – a core, stable group of executives steeped in the knowledge and culture of Westfield's business supplemented with executives from outside the company who bring new ideas and energy.

Continuing this process of building an ever-stronger and more effective executive team is one of our biggest challenges.

Many of our projects take many years from planning to final execution and so continuity of the team is a significant advantage over our competitors. The Group's senior team has an average age of 49 and the average length of service with Westfield is 13 years.

To maintain this advantage, the board sets our remuneration policies to retain talented executives for the long-term and ensure that Westfield remains an attractive option for the most talented executives in this industry worldwide.

The board and shareholders are very fortunate to have such a dedicated and skilled team working for the Group, and I'd like to thank all Westfield staff for the contribution they continue to make to our success.

Before I close, I'd like to remind you that while Westfield remains focussed on growth it recognises that this must include consideration of the economic, social and environmental aspects of our business.

The board believes that this philosophy leads to better risk management, cost savings, innovation and a performance within the business that drives shareholder returns and meets our obligations to the communities in which we operate.

This is why we aim not only to meet the various regulatory requirements in each market, but also support a large number of charitable and community projects which provide a financial and social benefit to local communities and major institutions like hospitals, schools and sporting associations.

Ladies and gentlemen, in summary the business is performing very well.

I remain confident that we can continue to achieve high income returns and capital growth for all Westfield investors, and I would like to restate the distribution forecast for 2006 of 106.5 cents per security.

Thank you very much for your attendance here today.

- the investment manager of Portfolios held for a number of institutional investors. The institutional investors are generally superannuation funds regulated under the Superannuation Industry Supervision Act 1993.

The holding of shares in WDC was acquired as part of the wide portfolio of Australian shares and units acquired for the Funds and the Portfolios.

The members of the Barclays Group and the Custodians may hold relevant interests due to the capacity of these entities to dispose of the shares in WDC.

Each investor in a Fund owns an undivided interest in the Fund's assets, no client directly owns any asset of the Fund. The unitholding of each Fund varies from time to time as clients enter and withdraw from the Funds. The various institutional investors with portfolios delegate the management of the portfolios to the members of the Barclays Group.

## INDEPENDENT AUDIT REPORT

To the Directors of Westfield Management Limited ("WML"):

### Scope

I have audited the compliance plan of the schemes listed in Appendix A which was established by WML as the responsible entity for the schemes for the financial year ended 31 December 2005. As directors of the responsible entity you are responsible for the design, documentation, operation and monitoring of the compliance plan and the adequacy of compliance measures contained in the plan, including the relevant internal control systems, policies and procedures, and compliance therewith. These responsibilities are set out in Part 5C.2 of the *Corporations Act 2001* applicable in Australia. I have conducted an independent audit of the compliance plan in order to express an opinion on it to the responsible entity.

My audit has been conducted in accordance with Australian Auditing Standards to provide reasonable assurance regarding the compliance plan. Accordingly, I have performed such tests and procedures as I considered necessary in the circumstances. My procedures included obtaining an understanding of the compliance plan and the compliance measures which it contains and examining, on a test basis, evidence supporting the operation of these compliance measures. These procedures have been undertaken to form an opinion whether, in all material respects, the responsible entity has complied with the compliance plan during the financial year ended 31 December 2005, and the compliance plan continues to meet the requirements of Part 5C.4 of the *Corporations Act 2001* as at that date.

This audit report has been prepared for WML as the responsible entity of the schemes listed in Appendix A in accordance with section 601HG of the *Corporations Act 2001*. I disclaim any assumption of responsibility for any reliance on this report to any person other than the responsible entity, or for any purpose other than that for which it was prepared.

### Inherent Limitations

Because of the inherent limitations of any compliance plan, it is possible that fraud, error or non-compliance with laws and regulations may occur and not be detected. An audit is not designed to detect all weaknesses in a compliance plan and the compliance measures in the plan as an audit is not performed continuously throughout the financial year and the audit procedures performed on the compliance plan and compliance measures are undertaken on a test basis.

Any projection of the evaluation of the compliance plans to future periods is subject to the risk that the compliance measures in the plan may become inadequate because of changes in conditions or circumstances, or that the degree of compliance with them may deteriorate.

The audit opinion expressed in this report has been formed on the above basis.

**Audit Opinion**

In my opinion, in all material respects:

- (a) Westfield Management Limited has complied with the compliance plan of the schemes listed in Appendix A for the financial year ended 31 December 2005; and
- (b) the compliance plan continues to meet the requirements of Part 5C.4 of the *Corporations Act 2001* as at that date.

## Explanatory Notes

### Item 2

This report is set out on pages 93 to 105 of the Annual Report. Additionally, the Corporations Act requires listed companies to put the Remuneration Report for each financial year to a resolution of members at the Company's Annual General Meeting. # How to complete this Proxy Form

## 1 Your Address

This is your address as it appears on the Westfield Group's securityholders' register. If this information is incorrect, please mark the box and make the correction on the form. Securityholders sponsored by a broker (in which case your reference number overleaf will commence with an 'x') should advise your broker of any changes. **Please note, you cannot change ownership of your securities using this form.**

## 2 Appointment of a Proxy

If you wish to appoint the Chairman of the Meeting as your proxy, mark the box. If the individual or body corporate you wish to appoint as your proxy is someone other than the Chairman of the Meeting please write the full name of that individual or body corporate. If you leave this section blank, or your named proxy does not attend the Meeting, the Chairman of the Meeting will be your proxy. A proxy need not be a securityholder of Westfield Group. Do not write the name of the issuer company or the registered securityholder in the space.

## 3 Votes on Items of Business

You may direct your proxy how to vote by placing a mark in one of the boxes opposite each item of business. All your securities will be voted in accordance with such a direction unless you indicate only a portion of voting rights are to be voted on any item by inserting the percentage or number of securities you wish to vote in the appropriate box or boxes. If you do not mark any of the boxes on a given item, your proxy may vote as he or she chooses. If you mark more than one box on an item your vote on that item will be invalid.

## 4 Appointment of a Second Proxy

You are entitled to appoint up to two proxies to attend the Meeting and vote on a poll. If you wish to appoint a second proxy, an additional Proxy Form may be obtained by telephoning Westfield Group's securityholder registry or you may copy this form.

To appoint a second proxy you must:

- on each of the first Proxy Form and the second Proxy Form state the percentage of your voting rights or number of securities applicable to that form. If the appointments do not specify the percentage or number of votes that each proxy may exercise, each proxy may exercise half your votes. Fractions of votes will be disregarded.
- return both forms together in the same envelope.

## 5 Signing Instructions

You must sign this form as follows in the spaces provided:

Individual: where the holding is in one name, the holder must sign.

Joint Holding: where the holding is in more than one name, all of the securityholders should sign.

Power of Attorney: to sign under Power of Attorney, you must have already lodged this document with the registry. If you have not previously lodged this document for notation, please attach a certified photocopy of the Power of Attorney to this form when you return it.

Companies: where the company has a Sole Director who is also the Sole Company Secretary, this form must be signed by that person. If the company (pursuant to section 204A of the Corporations Act 2001) does not have a Company Secretary, a Sole Director can also sign alone. Otherwise this form must be signed by a Director jointly with either another Director or a Company Secretary. Please indicate the office held by signing in the appropriate place.

If a representative of a corporate securityholder or proxy is to attend the Meeting the appropriate "Certificate of Appointment of Corporate Representative" should be produced prior to admission. A form of the certificate may be obtained from Westfield Group's securityholder registry.

## Lodgement of a Proxy

To be effective, a duly completed proxy form and (where applicable) any power of attorney or a certified copy of the power of attorney must be received by Computershare or at the registered office of Westfield Holdings Limited at an address set out below or submitted online at [www.westfield.com/corporate/investor](http://www.westfield.com/corporate/investor), not less than 48 hours before the time for commencement of the Meeting.

We advise that an estimated 9,516,698 ordinary stapled securities (the "New Securities") are proposed to be issued on 28 February 2006 pursuant to the Westfield Group DRP.

The New Securities will rank for distribution from 1 March 2006, and will participate as to 122/181 with respect to the distribution for the period ending 30 June 2006. They will rank equally with all other ordinary stapled securities on issue in respect of any subsequent distribution. In all other respects, the New Securities will rank equally with all other ordinary stapled securities on issue.

While the terms of the DRP allow the Westfield Group to scale back participation in the DRP on a pro rata basis, we wish to advise that no scale back will apply to the DRP with respect to the distribution for the period ended 31 December 2005.

A further notification to the Australian Stock Exchange will be made on Wednesday 31 August 2005 with confirmation of the final number of securities issued pursuant to the Westfield Group DRP.

Yours faithfully  
**WESTFIELD GROUP**

OFFICE OF INTERNATIONAL  
CORPORATE FINANCE**WESTFIELD GROUP ANNOUNCES FIRST FULL YEAR RESULT -  
STRONG PERFORMANCE IN ALL MARKETS**

The Westfield Group (ASX: WDC) today announced its first full year result as a merged entity, reporting a net profit of A\$4.2 billion for the 12 months to 31 December 2005. The distribution for the year was A\$1.8 billion representing 106.57 cents per stapled security.

The distribution is in line with forecasts contained in the Explanatory Memorandum of 25 May 2004 for the merger of Westfield Holdings, Westfield Trust and Westfield America Trust which was completed in July 2004. The second half distribution of 55.5 cents per stapled security is to be paid on 28 February 2006.

Group Managing Directors, Peter Lowy and Steven Lowy, said the strong result was due to a solid operational performance in all markets and the continued delivery of the Group's extensive development program during the year.

"We are pleased that on a comparable basis the Group's profit after tax of \$1.66 billion (96.8 cents per security) was ahead of the \$1.59 billion (94.9 cents per security) forecast contained in the Explanatory Memorandum.

"The size and quality of the portfolio, and its geographic diversity, provides the foundation for sustainable superior income and capital growth. This is achieved by the Group's intensive management of its centres and the ongoing redevelopment of its portfolio," they said.

The Group now has a significant development program with 18 projects underway at an investment of A\$6.8 billion, with Westfield's share being A\$4.6 billion.

The Group expects to commence A\$1.5 to 2.0 billion of redevelopment projects from the current portfolio in each of the next three years. These projects are expected to generate initial yields on cost in the range of 9-10%, with unleveraged internal rates of return of approximately 14%.

Last week Westfield announced the purchase of 15 Federated Department Stores at 11 Westfield Shopping Centres in the United States. In addition, Westfield and Federated have agreed upon 18 new redevelopments at Westfield-owned centres, enabling over US\$2 billion of new projects to be started in the next four years, further strengthening the Group's overall redevelopment program.

#### **Business Segment Reporting**

The introduction of AIFRS reporting in 2005 has made analysing the performance of the Group more complex, particularly with the inclusion of certain non cash items.

To make the Group's financial and operating performance clearer, Westfield will report on a segmented basis which mirrors the way the Group manages its business.

Profits will be reported in three segments: Operational, Development & New Business and Corporate.

- The Operational Segment will primarily comprise net property income from existing shopping centres, including completed developments and external fee income from third parties (eg. property management and development fees from joint ventures).
- The Development & New Business Segment will primarily comprise value creation from global development activities and costs incurred in the review and assessment of potential new assets and corporate acquisitions.
- The Corporate Segment will primarily include the revaluations of existing centres, changes in value of financial instruments, corporate entity expenses, income and withholding taxes, the effect of currency and balance sheet hedging and capital gains / losses.

#### Distribution

From 1 July 2006, the Group intends to distribute to security holders no more than 100% of the Operational Segment earnings adjusted for realised gains and losses from hedging the Group's overseas net income. These are the underlying earnings of the Group's shopping centres. From that date project profits will no longer be distributed.

A key aim of this distribution policy is to provide the Group with the flexibility and financial capacity to continue to invest in opportunities with strong returns.

For the 2006 and 2007 years Operational Segment earnings are forecast to grow at approximately 6% per annum on a constant currency basis. This reflects the underlying income growth from the existing portfolio and incremental income from developments completed during the year.

The Directors estimate that the distribution for 2006 will be 106.5 cents per stapled security. This includes a distribution of 54.5 cents per stapled security for the 6 months to 30 June 2006, which includes project profits of 7 cents per stapled security, and is consistent with the distribution forecast contained in the Explanatory Memorandum for the merger.

#### ENDS

Note: As the merger to form the Westfield Group occurred in July 2004, there are no comparable results for the Group in respect of the twelve months ended 31 December 2005.

## Westfield Group Results Overview for the Year Ended 31 December 2005

### Financial Highlights

|                           |              |                   |                    |
|---------------------------|--------------|-------------------|--------------------|
| Net Property Income       | A\$2,500 m   | Total Assets      | A\$43,051 m        |
| Profit After Tax          | A\$4,247 m   | Total Liabilities | A\$23,585 m        |
| Distribution              | A\$1,838 m   | Net Assets        | A\$19,466 m        |
| Distribution per Security | 106.57 cents | Gearing           | 41.4% <sup>1</sup> |

Westfield Group net profit was A\$4,247.2 million for the 12 months to 31 December 2005. The distribution of A\$1,838.3 million (106.57 cents per security) is in line with forecasts.

Total Income for the year including net contribution from equity accounted entities was A\$6,658 million with property income of A\$3,565 million and property revaluation gains of A\$3,192 million. Profit after tax of A\$4,247million also included A\$395 million of deferred tax expense in relation to the revaluation gains.

It is also important to highlight that as the merger to form the Westfield Group occurred in July 2004, the results for the period to December 2004 are for a six month period and therefore not comparable to the results for the 12 month period ending 31 December 2005.

Total assets have increased since 31 December 2004 from A\$34.0 billion to A\$43.1 billion. During the same period, the gross value of investments under management (including joint venture interests) rose by 25.3% from A\$41.9 billion to A\$52.5 billion. The increased value of the Group's shopping centre portfolio for the period has been driven by the acquisition of new properties, the completion of redevelopments and upward revaluations of the Group's portfolio.

At year end the weighted average cap rate of the property portfolio in each region was Australia 6.4%, United States 6.7%, United Kingdom 5.2%; and New Zealand 7.9%, reflecting a general firming of cap rates during the year.

The Group has continued to strengthen its financing structure by further diversifying its funding mix and lengthening its debt maturity profile. During the period, the Group raised:

- A\$2.35 billion from bond issues made up of a € 600 million issue for a six year term and £600 million issue for a 12 year term.
- A\$2.65 billion (US\$1.95 billion) under a US Syndicated Bank Facility.

The Group commenced its first development project in the UK with the £310 million redevelopment of The Eagle Centre at Derby. This project is forecast to deliver a yield in the range of 8.0 – 8.5%.

Property income from the UK operations was £70 million. This reflects a 12 months contribution from the shopping centres acquired as part of the Duelguide transaction in late 2004. The overall mall income growth was a very strong 6.6%, primarily attributed to the improved performance of the Merry Hill centre near Birmingham. At 31 December 2005, the portfolio was in excess of 99% leased.

Retail conditions in the United Kingdom remained relatively flat for most of the year, with trading over the Christmas period however generally positive for retailers.

### **Property transactions**

During the year, the Group acquired a further 25% interest in the super regional shopping centre development project at White City, West London, for £65 million - increasing the Group's interest in the White City centre to 50%.

The Group's total investment in White City is now expected to be approximately £900 million including the cost of acquiring Westfield's 50% interest for £130 million, with an initial yield range of 5.75% to 6.0%. The White City project is scheduled for completion in the first half of 2008. With over 150,000 square metres of retail and leisure space, White City will be the largest shopping centre in greater London.

During the year, the Group and its joint venture partner, Hermes, sold the Brunel Centre in Swindon for £130 million (Westfield Group share: £65 million) and also sold its interest in the Millgate Centre in Bury for £141 million (Westfield Group share: £70.5 million). Both centres were originally acquired in 2000 for £184 million (Westfield Group share: £92 million).

### **United States**

|                            |             |                                      |            |
|----------------------------|-------------|--------------------------------------|------------|
| Net Property Income        | US\$929 m   | Annual Retail Sales<br>- specialties | US\$7.3 bn |
| Group Property Investments | US\$13.9 bn | Retail Outlets                       | 9,400      |
| Centres                    | 67          | GLA (m sqm)                          | 6.6        |

The United States operations contributed net property income of US\$929 million with comparable mall income growth of 3.6%. This result reflects average specialty retail sales in the Group's US centres of US\$424 per square foot with comparable growth of 5.2% for the year. The strong sales growth has been led by the performance of the Group's West Coast and East Coast portfolios – up 6.8% and 5.2% respectively for the year.

(i) All equity accounted property partnerships, trusts and companies operate solely as retail property investors.

(ii) The Group has a 75% economic interest in Broadmarsh. The Group has equal representation and voting rights on the Board of Broadmarsh resulting in joint control, and as a consequence, significant influence. Accordingly, Broadmarsh has been accounted for as an associate in accordance with AASB 131: Interest in Joint Ventures.

(iii) On 24 November 2004 DGL Acquisitions Limited ("DGL") acquired a 100% interest in Duelguide plc ("Duelguide"), the company which owns the former London listed Chelsfield plc ("Chelsfield"), for cash consideration totalling £585 million.

DGL is 50% owned by Westfield Group entities and 50% owned by R&M Investments (BVI) Limited ("R&M"), a company that is jointly owned by entities associated with Multiplex Limited and Messrs. David and Simon Reuben.

In an agreement dated 17 October 2004, the shareholders of DGL agreed to allocate the direct ownership of the assets and liabilities of Duelguide to the Westfield Group and R&M.

On 18 May 2005 the Westfield Group agreed to purchase an additional 25% interest in Duelguide's White City development for £65 million from R&M, increasing its ownership of the White City development to 50%. Concurrently, the Westfield Group also agreed to acquire Chelsfield's £150 million White City land sale receivable and £70 million development funding deposit.

The assets allocated to the Westfield Group were subject to the usual cross guarantees associated with Duelguide's borrowings, including borrowings allocated to R&M. These encumbrances were removed following the refinancing of the Duelguide borrowings by the Westfield Group and R&M during early August 2005. For the period prior to the release of these encumbrances, the Westfield Group's interest in its underlying DGL assets has been accounted for under the equity method.

For the period subsequent to the release of these encumbrances, the Westfield Group's interest in its underlying DGL assets has been accounted for as follows:

## **WESTFIELD GROUP TO ACQUIRE 15 FEDERATED DEPARTMENT STORE SITES**

The Westfield Group (ASX: WDC) announced today it had agreed to acquire 15 department store sites owned by Federated Department Stores, Inc. at 11 Westfield shopping centres in the United States.

Federated Department Stores previously announced that it would dispose of 84 surplus stores as part of their acquisition of The May Department Stores Company.

Westfield will acquire the 15 stores in two separate transactions. The acquisition of 12 of the stores will be in exchange for 12 department store properties currently owned by Westfield and leased to May Company. The 12 stores to be exchanged were originally acquired by Westfield as part of the CenterMark transaction in 1994. Of these 12 stores only two are located in Westfield centres. The current income from those sites is US\$7.88 million per annum. In the second transaction, Westfield will acquire three stores for US\$18.5 million.

Separately, Westfield and Federated have agreed upon 18 new redevelopments at Westfield-owned shopping centres.

"We are extremely pleased with the transactions, which are the result of our two companies working very closely together for months to achieve a significant future redevelopment pipeline," said Group Managing Director Mr Peter Lowy. "The acquisition creates new opportunities to further reinvest in and improve our portfolio, enabling over US\$2 billion of new redevelopments to be initiated in the next four years." These are expected to generate income yields on cost of 9.5-10% (including costs to Federated).

As part of these redevelopments Westfield is negotiating with other anchor stores including Nordstrom, JCPenney and Target, as well as cinema operators, lifestyle retailers and signature restaurants.

Westfield has a strong track record in the US of acquiring and redeveloping former department stores to reorient the merchandise mix with new anchor stores, specialty shops and/or new restaurant, entertainment, and lifestyle precincts.

"This is a terrific opportunity to further revitalize our properties by both strengthening Federated's market presence and opening up the ability for major expansion and renovation," said Westfield US Managing Director, Ken Wong.

## **WESTFIELD UNVEILS PLANS FOR WORLD-CLASS RETAIL AND OFFICE COMPLEX FOR SYDNEY CBD**

The Westfield Group (ASX:WDC) today unveiled plans for a \$600 million, world-class retail and office development project in the heart of Sydney's CBD linking the Centrepont, Imperial Arcade and Skygarden properties.

The project will help restore Sydney's CBD as a high quality retail destination and deliver a much-needed facelift to the Pitt St mall, Market St and Castlereagh St shopping and office precinct.

The redevelopment will provide a showcase for the best Australian and international retailers and is the latest in a series of high quality CBD developments for Westfield around the world, including Century City in Los Angeles, the San Francisco Centre, Bondi Junction in Sydney and more recently the White City project which will become London's largest shopping centre.

Each of these projects features a strong focus on leading edge design, high quality finishes and the latest retail trends.

Westfield lodged its Stage 1 Development Application for the project this week with the City of Sydney Council. The DA incorporates feedback from Council, residents and adjoining businesses following the lodgement of an earlier DA which dealt only with the Centrepont property.

Major changes from the original DA include reducing the number of towers from three to one, shifting the new tower north, away from impeding the view of the base of Centrepont tower, and substantially reducing the number of car parking spaces from 500 to 188.

The new Stage 1 DA includes a comprehensive Statement of Environmental Effects with an Urban Design Assessment, Sustainability Report, Shadow Analysis, and Economic Impact Statement.

As with any CBD redevelopment on the scale proposed, Westfield recognises that the project will necessarily cause temporary disruption. Accordingly, Westfield has taken particular care and devoted significant resources to develop a detailed construction management plan which aims to minimise the impact on businesses and visitors to the area during the construction phases.

This plan would not typically be provided until the Stage 2 DA but has been lodged with Council with the Stage 1 DA this week.

media release

The construction management plan draws on Westfield's extensive experience with major redevelopments in busy CBD locations. It includes provision for offsite marshalling of trucks; state-of-the-art dust and noise control; maintenance of pedestrian movement around the site and innovative hoardings.

The project is expected to be completed in stages over three years.

The redevelopment will improve Pitt St mall for pedestrians by removing all truck and delivery vehicle movements serving the three Westfield properties.

It will provide more than 3,000 construction jobs, more than 1000 jobs in the completed retail centre, and 3,400 jobs in the office precincts.

The project will create 300 stores over a total retail space of 38,000 square metres.

The Stage 1 DA seeks approval for the refurbishment of the existing office building at 100 Market St to an A Grade commercial office space.

Approval is also sought for a new 27-storey commercial tower to be built above the retail facility, which is proposed to be designed to a 5-Star Green-Star and 5-Star Australian Building Greenhouse Rating specification, recognised as Australian best-practice standard in commercial building design. The existing office complex above Skygarden will remain unchanged.

In addition to the formal Council public advertising process, Westfield will provide a program of briefings and consultations with retailers and adjoining business owners, community groups and interested parties.

A fact sheet on the project is attached and images of the proposed redevelopment can be viewed at [westfield.com](http://westfield.com).

# Report to Securityholders

I am pleased to present this Half Year Report to securityholders covering the consolidated results of the Westfield Group for the six months ended 30 June 2005 as well as an overview of the Group's operations for the half year.

The Westfield Group announced its first result under the new International Financial Reporting Standards (A-IFRS), reporting a net profit of \$1,534.5 million for the six months to 30 June 2005. Net property income, before revaluations, amounted to \$1,169 million. The distribution for the period was \$873.6 million, representing 51.07 cents per stapled security.

The distribution is in line with forecasts contained in the Explanatory Memorandum (dated 25 May 2004) for the merger of Westfield Holdings, Westfield Trust and Westfield America Trust, completed in July 2004.

These results reflect the underlying strength and stability of the Group's earnings which is largely attributable to the high quality of the Group's shopping centre portfolio in established markets around the world.

The Group's shopping centre operations in all markets continued to perform well during the half year. Specialty retail sales continue to show positive signs in the United States, Australian and New Zealand markets with the United Kingdom remaining relatively flat. In particular, in the United States, the Group has reported strong performances on both the East and West coasts.

Leasing also continues to be strong in all markets with Australia, New Zealand and the United Kingdom at almost full occupancy. In the United States the portfolio is currently 93.5% leased compared to 92.5% at the same time last year.

At 30 June 2005, the Westfield Group had interests in 126 shopping centres with a value of approximately \$46.3 billion. The centres accommodate 20,900 retailers and comprise 10.2 million square metres of retail space.

Other highlights for the period include:

- Commencement of 5 additional developments with an aggregate project cost of \$1.5 billion. The Group's current development program with 17 projects under construction for an aggregate project cost of \$6.7 billion (Westfield Group share: \$4.1 billion), is larger than at any time in the Group's history.
- Acquisition of \$1.2 billion of shopping centre assets:
  - \$650 million in Australia;
  - US\$320 million in the United States; and
  - £65 million in the United Kingdom.
- Gross value of investments under management increased by 10.5% to \$46.3 billion. The increased value of the Group's shopping centre portfolio has been driven by revaluations, the acquisition of new properties and the completion of redevelopments.
- Further diversification of the Group's debt funding sources with a debut issue in the Eurobond market raising the equivalent of A\$2.35 billion.

#### OUTLOOK

It has been another positive period for the Group with the strong operating results, ongoing development, acquisition and financing transactions undertaken over the last six months further strengthening the platform for future income and capital growth. The directors are therefore confident in reconfirming the distribution forecasts contained in the Explanatory Memorandum for the periods to 30 June 2006 as well as the financial year distribution forecast to 31 December 2005 of 106.5 cents per stapled security.

## Group Financial Performance

### FINANCIAL HIGHLIGHTS

|  |              |

| Net Property Income                      | \$1,188.7 m  |

| Distribution                             | \$873.6 m    |
| Earnings per Security                    | 90.36 cents  |
| Distribution per Security                | 51.07 cents  |
| Total Assets                             | \$38,420.0 m |
| Total Liabilities                        | \$19,283.3 m |
| Net Assets                               | \$19,136.7 m |
| Adjusted Net Tangible Asset per security | \$11.28      |
| Gearing                                  | 39.8%        |

The Group's first result following the introduction of the International Financial Reporting Standards (A-IFRS), reported a net profit of \$1,534.5 million for the six months to 30 June 2005. The distribution of \$873.6 million (51.07 cents per security) is in line with merger forecasts.

It is important to highlight that, due to seasonality, foreign exchange movements and the application of A-IFRS, the results for the 6 months to June 2005 do not directly reflect the underlying operating performance of the Group when compared with the results for the 6 months to December 2004. For example, the impact on the Income Statement of property revaluations (required to be included following the introduction of A-IFRS) are significant in each period (ie. June 2005 - \$1.2 billion and December 2004 - \$2.8 billion).

Earnings per security for the period is 90.36 cents. As a consequence of the introduction of A-IFRS, the Group's earnings per security include non-cash items such as the increase in value of properties in the Group's portfolio, unrealised gains (or losses) on the Group's treasury and hedging instruments and deferred tax on these items. Accordingly these non-cash items do impact the amount which can properly be distributed to Securityholders.

\* NTA per security after excluding the impact of the application of A-IFRS.

\* Gearing as measured under the Group's global bond offerings.

The Group's distribution for the period is 51.07 cents per security and the distribution forecast for the 12 months to 31 December 2005 is confirmed at 106.5 cents per security.

Total assets have increased since 31 December 2004 from \$33.9 billion to \$36.4 billion. During the same period, the gross value of investments under management rose by 10.5% from \$41.9 billion to \$46.3 billion. The increased value of the Group's shopping centre portfolio for the period has been driven by revaluations, the acquisition of new properties and the completion of redevelopments. As a result, the net tangible asset per security at 30 June 2005, excluding the impact of the application of A-IFRS, was \$11.28.

The Group has continued to strengthen its financing structure by further diversifying its funding mix and lengthening its debt maturity profile. During the period, the Group raised the equivalent of A\$2.35 billion from the Eurobond market through its first issue denominated in both Euro and Sterling.

The Group's gearing level at 30 June 2005 (determined using the methodology required under the Group's bond issues), was 39.8%. Based on equity market capitalisation of \$30.6 billion (at 30 June 2005), net debt to total market capitalisation was 34%.

The total distribution for the period of 51.07 cents per stapled security comprises:

- distributions from both Westfield Trust and Westfield America Trust totalling 44.66 cents per security (87.4% of the total distribution) which are tax advantaged to approximately 33.5%; and
- a fully franked dividend from Westfield Holdings of 6.41 cents per security (12.6% of total the distribution).

## Group Operating Performance

The Australian and New Zealand operations contributed net property income of \$532m for the reporting period and represents a comparable mall income growth of approximately 5.8%. This performance reflects the steady retail conditions which prevailed in the reporting period as well as the quality of the portfolios in both regions, with occupancy rates continuing to be in excess of 99.5%.

Retail sales in the Group's 40 Australian centres totalled \$15.8 billion, up 7.8% for the 12 months to 30 June 2005. On a comparable basis, total sales increased 4.5% with specialty store sales up 5.7%. Retail sales at the Group's 11 shopping centres in New Zealand increased 3.3% to NZ\$1.6 billion for the 12 months to 30 June 2005. On a comparable basis, total sales increased 1.8% with specialty store sales up 3.0%.

### PROPERTY TRANSACTIONS

During the period the Group announced the acquisition of a 50% interest in Penrith Plaza, Sydney for \$404.3 million (net of acquisition costs and inclusive of project costs to date) as well as a 50% interest in Woden Plaza, Canberra for \$245.3 million (net of acquisition costs). Following the acquisition of these interests, Westfield Group has been appointed manager of both properties effective from 1 July 2005.

### DEVELOPMENT PROJECTS

In Australia there are currently 6 projects under construction. The \$60 million redevelopment of Westfield Innaloo in Perth is expected to be finished in the third quarter of 2005. The Group's \$180 million development of Westfield Helensvale on Queensland's Gold Coast is progressing ahead of schedule and is expected to be completed in October 2005. Two other projects are expected to be completed in late

2005 – the \$120 million redevelopment of Westfield Tuggerah, on the NSW Central Coast and the \$65 million upgrade of Westfield Mt Druitt in Sydney. The \$105 million redevelopment of Westfield Parramatta in Sydney is currently scheduled for completion by the second quarter of 2006.

During the period we also commenced the \$200 million redevelopment of Westfield Liverpool in western Sydney which is anticipated to be complete for opening before Christmas 2006.

In New Zealand, the NZ\$170 million redevelopment of Westfield Queensgate in Wellington is progressing well and is expected to be completed at the end of 2005.

The current target weighted average yield range of the projects under construction in Australia and New Zealand is 9.6% to 9.9%. This reflects the Group's incremental income yield on the Group's project cost.

## UNITED KINGDOM

|----------------------------|-----------|
| Net Property Income        | \$91.1m*  |

| Lettable Area (m sqm)      | 1,040,000 |

\* Not of interest expense.

In the last six months our operations in the United Kingdom have expanded significantly as a consequence of the Group's acquisition of properties as part of the Duelfield transaction. In a subsequent related transaction, the Group has increased its ownership interest in the White City project in London and expanded its role in the development and future management of this landmark asset.

Our expansion strategy in the UK is to focus on the ownership, management and development of major regional shopping centre assets.

During the period, construction commenced on the Group's first development project in the UK – the £310 million redevelopment of The Eagle Centre at Derby.

## Group Operating Performance cont'd

Property income for the period from the UK operations was \$81 million. This reflects a full six months contribution from the shopping centres acquired as part of the Duellguide transaction and an overall mall income growth of 3.2%. At 30 June 2005, the portfolio was in excess of 99% leased.

Generally, retail conditions in the United Kingdom remained relatively flat for the six months.

### PROPERTY TRANSACTIONS

During the period, the Group acquired a further 25% interest in the super regional shopping centre development project at White City, West London, for £65 million - increasing the Group's interest in the White City centre to 50%.

The Group's total investment in White City is now expected to be in the range of £850 to £870 million including the cost of acquiring Westfield's 50% interest for £130 million, with an initial yield range of 5.75% to 6.0%. The White City project is scheduled for completion in the first half of 2008. With over 150,000 square metres of retail and leisure space, White City will be the largest shopping centre in greater London.

During the period, the Group and its joint venture partner, Hermes, sold the Brunel Centre in Swindon for £130 million (Westfield Group share: £65 million). The Brunel Centre was originally acquired in May 2000 for £104 million (Westfield Group share: £52 million).

### UNITED STATES

|                                   |            |
|-----------------------------------|------------|
| Net Property Income               | \$556 m    |
| Group Property Investments        | \$17,304 m |

| Leasable Area (m sqm)             | 6.4        |

The United States operations contributed net property income of \$556 million during the reporting period which represents comparable mall income growth of 4.0%. This result reflects the strong retail conditions in the US, particularly in our East Coast and West Coast regions.

During the 12 months to 30 June 2005, sales per square foot in the Group's US centres increased by 5.1% to US\$414 per square foot.

At June 2005 the portfolio was 93.5% leased, which is ahead of the 92.5% last year. New leases totalling 2.1 million square feet were completed during the six months. New mall shop rents represent a 19.1% increase over expiring rents. The average portfolio rent at June 2005 of US\$38.47 per square foot represents a 3.3% increase over the 6 months to June 2004.

#### **PROPERTY TRANSACTIONS**

In the United States, during the reporting period, the Group purchased:

- Chicago Ridge in Chicago, Illinois for US\$108 million at a yield of 8.0%;

The projects in Florida and Indiana are both due for completion in the 4th quarter of 2006.

The largest project undertaken by the Group in the US – the US\$440 million redevelopment of San Francisco Center in downtown San Francisco, California, is continuing on schedule with completion anticipated for 4th quarter 2006. Westfield's share of this development is US\$220 million.

## Abridged Consolidated Financial Statements

In the following Financial Statements we have provided a summary of the Income Statement, Statement of Proposed Distribution, Balance Sheet and Cash Flow Statement prepared under International Financial Reporting Standards (A-IFRS) for the six months ended 30 June 2005.

The full financial Statements of Westfield Group, comprising Westfield Holdings Limited and its controlled entities can be viewed on our website at [www.westfield.com](http://www.westfield.com) or requested from Westfield Group Investor Relations on +61 2 9358 7877.

We wish to point out that as the merger to form the Westfield Group occurred in July 2004, there are no comparable results for the Group in respect of the half year ended 30 June 2004. In addition, due to seasonality, foreign exchange movements and the application of A-IFRS, the results for the six months ended 30 June 2005 do not directly reflect the underlying operating performance of the Group when compared with the results for the six months ended 31 December 2004. Accordingly, no comparatives have been included in the abridged Consolidated Financial Statements of the Westfield Group appearing on pages 10 through 13 of this Half Year Report.

## **WESTFIELD GROUP OPENS NEW CENTRE IN QUEENSLAND**

The Westfield Group (ASX: WDC) announced that Queensland Premier Peter Beattie will tomorrow officially open the new Westfield Helensvale shopping centre on the Gold Coast.

The \$180 million development is a 50:50 joint venture between Westfield Group and QIC Real Estate and is the first shopping centre development between the two groups.

The project was completed several months ahead of schedule and is the second "greenfield" development for Westfield in Queensland in recent years.

Westfield Helensvale, located at the junction of the Pacific Motorway and Gold Coast Highway, has 42,000 square metres of leasable area and 5 major retailers including Coles, Woolworths, K-Mart, Target and Aldi, and 150 specialty stores. It also features a Main Street precinct with outdoor dining, family restaurants, cafes and a hotel and has direct pedestrian access to the Helensvale railway station.

The project generated more 2,000 jobs during construction, and 1,200 on completion.

Westfield managing director, Steven Lowy, said the new centre would be a significant addition to the Group's Australian portfolio of 42 centres.

"Helensvale's main trade area serves one of Australia's fastest-growing regions, with population forecast to grow at 5% per annum over the next five years," he said.

"We are extremely pleased with the outcome of this project which not only was completed ahead of schedule but has also exceeded the Group's original investment return estimates, forecast to deliver an immediate capital appreciation of over 25%."

Westfield Group's total investment in Queensland is more than \$2 billion with interests in seven centres, five in Brisbane and two on the Gold Coast.

In addition Westfield is investing a further \$180 million in the redevelopment of Westfield Chermside due for completion in late 2006, and has plans to begin the Stage Two redevelopment of Westfield North Lakes over the next 12 to 18 months.

### **ENDS**

**GPT ANNOUNCES RESOLUTION  
OF SUNSHINE PLAZA COURT CASE**

**27 September 2005**

---

GPT advise that, following a hearing in the NSW Supreme Court, the Court determined that, contrary to assertions by Lend Lease Real Estate Investments Ltd (Lend Lease), GPT's conditional arrangements with Westfield in relation to Sunshine Plaza did not trigger any pre-emptive right under the Joint Ownership Agreement between GPT and Australian Prime Property Fund Retail ("APPF"). The decision confirms GPT's view that there is no obligation for GPT to sell its interest in the property to APPF.

As outlined in the Notice of Meeting and Explanatory Memorandum issued by GPT dated 2 May 2005, GPT is not obliged to sell a 25% interest in Sunshine Plaza to Westfield unless certain preconditions have been met. Those conditions have not yet been met.

The Court ordered that Lend Lease pay GPT's costs and restrained Lend Lease from conducting a valuation of the Centre.

**NOTES TO THE FINANCIAL STATEMENTS**  
for the half year ended 30 June 2005

**1 BASIS OF PREPARATION OF THE HALF YEAR FINANCIAL REPORT**

**(a) Statement of Compliance with Australian Equivalents to International Financial Reporting Standards**

This interim financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards ("AIFRS"). Compliance with AIFRS ensures that the financial report, comprising the financial statements and the notes thereto, complies with International Financial Reporting Standards.

This is the first financial report prepared based on AIFRS. The date of transition of AIFRS is 1 January 2004, accordingly the financial information for the half year ended 30 June 2004 and year ended 31 December 2004 have been restated. A summary of the significant accounting policies of the Group under AIFRS are disclosed in Note 2 below.

Note 3 includes reconciliations between previously reported Australian Generally Accepted Accounting Principles ("AGAAP") as at 31 December 2004 to AIFRS including:

- a reconciliation between AGAAP and AIFRS equity as at 1 January 2004, 30 June 2004 and 31 December 2004; and
- a reconciliation between AGAAP and AIFRS profit for the half year ended 30 June 2004 and full year ended 31 December 2004.

**(b) Interim reporting**

The interim financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the income statement, balance sheet and financing and investing activities of the consolidated entity as the full financial report.

The interim financial report should be read in conjunction with the annual financial report of WT as at 31 December 2004, which was prepared based on Australian Accounting Standards applicable before 1 January 2005.

It is also recommended that the interim financial report be considered together with any public announcements made by the Westfield Group during the half year ended 30 June 2005 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

**(c) Basis of Accounting**

The interim financial report is a general-purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, applicable Accounting Standards including AASB 134 "Interim Financial Reporting" and other mandatory professional reporting requirements. The interim financial report has also been prepared on a historical cost basis, except for investment properties, derivative financial instruments and available-for-sale financial assets that have been measured at fair value.

For the purpose of preparing the interim financial report, the half year has been treated as a discrete reporting period.

**(a) Listed Property Trust Units**

WT has had its constitution amended at its members' meeting on 12 May 2005. These amendments include removing the finite maximum term of each Trust, which allows the unitholders' funds to remain as equity in accordance with AASB 132 "Financial Instruments: Presentation and Disclosure". The AIFRS comparatives disclosed in this interim financial report include unitholders' funds as equity.

**(b) Consolidation and classification**

The Westfield Group was established in July 2004 by the stapling of securities of each of Westfield Holdings Limited ("WHL"), Westfield America Trust ("WAT") and WT. The securities trade as one security on the Australian Stock Exchange under the code WDC. The stapling transaction is referred to as the "Merger".

The consolidated financial report comprises the financial statements and notes to the financial statements of WT (the "Parent Entity"), and each of its controlled entities as from the date the Parent Entity obtained control until such time control ceased. The Parent Entity and controlled entities are collectively referred to as "the Group". Where entities adopt accounting policies which differ from those of the Parent Entity, adjustments have been made so as to achieve consistency within the Group.

In preparing the consolidated Financial Statements all inter-entity transactions and balances, including unrealised profits arising from intra group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered. Minority interest for the period 1 January to 30 June 2005 represents interests in Carindale Property Trust ("CPT") not held by the Group.

**NOTES TO THE FINANCIAL STATEMENTS**  
for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(b) Consolidation and classification (continued)**

*i) Synchronisation of Financial Year*

By an order dated 27 June 2005, made by ASIC pursuant to subsection 340(1) of the Act, the Directors of Parent Entity have been relieved from compliance with subsection 323D(3) of the Act insofar as that subsection requires them to ensure the financial years of the controlled entity CPT, coincides with the financial year of Parent Entity.

Notwithstanding that the financial year of CPT ends on 30 June, the consolidated Financial Statements have been made out so as to include the accounts for a period coinciding with the financial year of the Parent Entity being 31 December.

*ii) Joint Ventures*

*Joint venture operations*

The Group has significant co-ownership interests in a number of properties through unincorporated joint ventures. These interests are held directly and jointly as tenants in common. The Group's proportionate share in the income, expenditure, assets and liabilities of property interests held as tenants in common have been included in their respective classifications in the financial report.

*Joint venture entities*

The Group has significant co-ownership interests in a number of properties through property partnerships or trusts. These joint venture entities are accounted for using the equity method of accounting.

The Group and its joint venture entities use consistent accounting policies. Investment in joint venture entities are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the joint venture entities. The consolidated income statement reflects the Group's share of the results of operations of the joint venture entity.

*iii) Associates*

Where the Group exerts significant influence but not control, equity accounting is applied. The Group and its associates use consistent accounting policies. Investment in the associates are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the associates. The consolidated income statement reflects the Group's share of the results of operations of the associate. Where there has been a change recognised directly in the associate's equity, the Group recognises its share of any changes and discloses this, when applicable, in the consolidated financial statements.

*iv) Controlled entities*

Where an entity either began or ceased to be a controlled entity during the reporting period, the results are included only from the date control commenced or up to the date control ceased. Minority interests are shown as a separate item in the consolidated financial statements.

Incremental interests acquired in controlled entities are reflected at their fair values. Adjustments have been made to the relevant equity interests to reflect any differences between the purchase price and the fair value. Adjustments have also been made to each class of equity interests to reflect the appropriate proportionate ownership interests.

**(c) Investment properties**

The Group's investment properties include freehold and leasehold land, buildings, leasehold improvements, construction and development projects.

Land and buildings are considered as having the function of an investment and therefore are regarded as a composite asset, the overall value of which is influenced by many factors, the most prominent being income yield, rather than by the diminution of value of the building content due to effluxion of time. Accordingly, the buildings and all components thereof, including integral plant and equipment, are not depreciated.

Initially, investment properties are measured at cost including transaction costs. Subsequent to initial recognition, the Group's portfolio of investment properties is stated at fair value. Gains and losses arising from changes in the fair values of investment properties are included in the income statement in the year in which they arise. Investment properties are derecognised when they have been disposed of. Any gains or losses on the derecognition of an investment property are recognised in the income statement in the year of derecognition.

Amounts capitalised to construction and development projects include the cost of sundry acquisitions and development costs in respect of qualifying assets and borrowing costs during the development.

At each reporting date, the carrying value of the portfolio of investment properties is assessed by the Directors and where the carrying value differs materially from the Directors' assessment of fair value, an adjustment to the carrying value is recorded as appropriate.

for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(c) Investment properties (continued)**

The Directors' assessment of fair value of each investment property is confirmed by annual independent valuations conducted on a rolling basis. In determining the fair value, the capitalisation of net income method and the discounting of future cash flows to their present value have been used.

**(d) Other investments**

Other investments are classified as available-for-sale. Listed investments in entities are stated at fair value based on their market values. Unlisted investments are stated at fair value of the Group's interest in the underlying assets or cost.

Gains or losses on available-for-sale investments are recognised as a separate component of equity until the investment is sold, collected or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in the income statement.

**(e) Foreign currencies**

*i) Translation of foreign currency transactions*

The functional and presentation currencies of the Parent Entity is Australian dollars. The functional currency of its entities in New Zealand is New Zealand dollars. The presentation currency of the overseas entities is Australian dollars to enable the consolidated financial statements of the Group to be reported in a common currency.

Foreign currency transactions are converted to Australian dollars at exchange rates ruling at the date of those transactions. Amounts payable and receivable in foreign currency at balance date are translated to Australian dollars at exchange rates ruling at that date. Exchange differences arising from amounts payable and receivable are treated as operating revenue or expense in the period in which they arise, except as noted below.

*ii) Translation of accounts of foreign operations*

The balance sheet of foreign subsidiaries and equity accounted associates are translated at exchange rates ruling at balance date and the income statement of foreign subsidiaries and equity accounted associates are translated at average exchange rates for the period. Exchange differences arising on translation of the interests in foreign operations and equity accounted associates are taken directly to the Foreign Currency Translation Reserve. On consolidation, exchange differences and the related tax effect on loans and cross currency swaps denominated in foreign currencies which hedge net investments in foreign operations and equity accounted associates are taken directly to the Foreign Currency Translation Reserve.

**(f) Revenue from continuing operations**

Revenues from rents and other property income are brought to account on an accruals basis and, if not received at balance date, are reflected in the balance sheet as receivables and are carried at fair value. Recoveries from tenants are recognised as income in the year the applicable costs are accrued. Profits from the sale of property investments are recognised upon settlement and after contractual duties are completed.

Certain tenant allowances that are classified as lease incentives are recorded as a separate asset and amortised over the term of the lease. The amortisation is recorded against property income.

All other revenues are recognised on an accruals basis.

**(g) Expenses from continuing operations**

Expenses from ordinary activities including rates, taxes and other outgoings, are brought to account on an accruals basis and any related payables are carried at cost. All other expenses are brought to account on an accruals basis.

**(h) Taxation**

Under current Australian income tax legislation WT is not liable to Australian income tax, including capital gains tax, provided that Members are presently entitled to the income of the Trust as determined in accordance with WT's constitution. WT's New Zealand controlled entities are subject to New Zealand tax on their earnings. Dividends paid by those entities to WT are subject to New Zealand dividend withholding tax.

Under current Australian income tax legislation, holders of the stapled securities of the Westfield Group may be entitled to receive a foreign tax credit for New Zealand withholding tax deducted from dividends paid by WT's New Zealand controlled entities to WT.

Deferred tax is the tax expected to be payable or recoverable, by the entity, on differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised through continued use or the liability is settled, based on tax rates (and tax laws) that have been enacted at the balance sheet date. Income taxes related to items recognised directly in equity are recognised in equity and not in the income statement.

**COMPRISING WESTFIELD TRUST AND ITS CONTROLLED ENTITIES**  
**NOTES TO THE FINANCIAL STATEMENTS**  
for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(i) Goods and Services Tax ("GST")**

Revenues, expenses and assets are recognised net of the amount of GST except where the GST incurred on purchase of goods and services is not recoverable from the tax authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable. Receivables and payables are stated with the amounts of GST included.

The net amount of GST payable or receivable to government authorities is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

**(j) Financing costs**

Financing costs include interest, amortisation of discounts or premiums relating to borrowings and other costs incurred in connection with the arrangement of borrowings. Financing costs are expensed as incurred unless they relate to a qualifying asset. A qualifying asset is an asset which generally takes more than 12 months to get ready for its intended use or sale. In these circumstances, the financing costs are capitalised to the cost of the asset. Where funds are borrowed by the Group for the acquisition or construction of a qualifying asset, the amount of financing costs capitalised are those incurred in relation to that borrowing.

Refer to Note 2(n) for other items included in financing costs.

**(k) Leases**

Leases are classified at their inception as either operating or finance leases based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

*(i) Operating leases*

The minimum lease payments of operating leases, where the lessor effectively retains substantially all of the risks and benefits of ownership of the leased item, are recognised as an expense on an accruals basis.

Ground rent obligations for leasehold land that meets the definition of an investment property are accounted for as a finance lease.

*(ii) Finance leases*

Leases which effectively transfer substantially all of the risks and benefits incidental to ownership of the leased item to the Group are capitalised at the present value of the minimum lease payments under lease and are disclosed as an asset or investment property.

Capitalised lease assets are depreciated over the shorter of the estimated useful life of the assets and the lease term. Minimum lease payments are allocated between interest expense and reduction of the lease liability.

**(l) Contributed equity**

Issued and paid up capital is recognised at the fair value of the consideration received by the Group. Any transaction costs arising on the issue of ordinary units are recognised directly in equity as a reduction of the unit proceeds received.

**(m) Cash flows**

Cash on hand, at bank and short-term deposits are stated at nominal value. For the purposes of the Cash Flow Statement, cash includes cash on hand and at bank, short term money market deposits and bank accepted bills of exchange readily convertible to cash, net of bank overdrafts and short term loans. Bank overdrafts are carried at the principal amount. Interest is charged as an expense as it accrues.

**(n) Derivative and other financial instruments**

The Group's activities expose it to changes in interest rates and foreign exchange rates. There are policies and limits in respect of the use of derivative and other financial instruments to hedge cash flows subject to interest rate and currency risks.

There is a comprehensive hedging program implemented by the Group that is used to manage interest and exchange rate risk.

Derivatives are not entered into for speculative purposes and the hedging policies are approved and monitored by the Board.

Accounting standards however, include onerous documentation, designation and effectiveness requirements before a derivative financial instrument can qualify for hedge accounting. The Group's treasury transactions are undertaken to achieve economic outcomes in line with its treasury policy. The AIFRS documentation, designation and effectiveness requirements cannot be met in all circumstances. As a result all derivatives other than cross currency swaps that hedge investments in foreign operations do not qualify for hedge accounting and are recorded at fair value through the profit and loss account.

for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(n) Derivative and other financial instruments (continued)**

The fair value of forward exchange contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of interest rate swap contracts is determined by reference to market values for similar instruments. The accounting policies adopted in relation to material financial instruments are detailed as follows:

*i) Financial assets*

*Receivables*

Trade and sundry debtors are carried at amortised cost, less provision for doubtful debts, and are generally due within 30 days.

*Other loans*

Loans are carried at cost. Interest is credited as income on an accruals basis.

*ii) Financial liabilities*

*Payables*

Trade and sundry creditors are carried at amortised cost, and are generally payable within 60 days.

*Interest bearing liabilities*

Interest bearing liabilities are carried at amortised cost or at their fair value at the time of acquisition in the case of assumed liabilities. Interest is charged as an expense on an accruals basis.

*Other financial liabilities*

Other financial liabilities include convertible debt. Where the redemption terms include the settlement for cash on redemption the instrument is classified as a derivative and is fair valued through the income statement.

*iii) Interest rate swaps*

The Group enters into interest rate swap agreements that are used to convert certain variable interest rate borrowings to fixed interest rates. The swaps are entered into with the objective of hedging the risk of interest rate fluctuations in respect of underlying borrowings.

Derivatives entered into to reduce exposures to fluctuations in floating interest rates may be accounted for as cash flow hedges provided the hedge designation, documentation and effectiveness tests can be met. If these tests are satisfied then the hedging derivative is measured at fair value and gains or losses are reflected directly in equity until the hedged transaction occurs, when they are released to the income statement. To the extent that the hedges do not qualify for hedge accounting then gains or losses arising from changes in fair value is reflected in the income statement immediately.

*iv) Cross currency swaps and forward exchange contracts*

The Group enters into cross currency swaps and forward exchange contracts where it agrees to buy or sell specified amounts of foreign currencies in the future at predetermined exchange rates. The objective is to minimise the risk of exchange rate fluctuation in respect of certain of its foreign currency denominated assets, liabilities, revenues and expenses. The Group only enters into derivative financial instruments to hedge certain underlying assets, liabilities, revenues and expenses.

The forward exchange contracts entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's functional currency do not qualify for hedge accounting. Accordingly, such derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

The foreign exchange exposure on net investments in foreign operations qualify for hedge accounting provided that the hedge designation, documentation and effectiveness tests are met. If these tests are satisfied then the hedging derivative is measured at fair value and gains and losses reflected in the foreign currency translation reserve. To the extent that the hedge does not qualify for hedge accounting then a corresponding portion of the gain or loss is reflected in the income statement.

*v) Disclosure of fair values*

Recognised financial assets and liabilities are recorded at balance date at their net fair values with the exception of investments in associates which are carried at cost plus post-acquisition changes in the Group's share of net assets of the associates, less any impairment in value. Refer Note 2(b).

**(o) Rounding**

In accordance with ASIC Class Order 98/0100, the amounts shown in the Financial Report have, unless otherwise indicated, been rounded to the nearest tenth of a million dollars. Amounts shown as 0.0 represent amounts less than \$50,000 that have been rounded down.

**3 IMPACT OF ADOPTING AIFRS**

**(a) AASB 1 transitional exemptions**

The Group has made its election to the transitional exemptions allowed by AASB 1 "First-time Adoption of Australian Equivalents to International Financial Reporting Standards" as follows:

- i) AASB 3 "Business Combinations" was not applied retrospectively to business combinations undertaken before the date of transition to AIFRS.
- ii) AASB 2 "Share Based Payments" is applied only to equity instruments granted after 7 November 2002 that had not vested on or before 1 January 2005.
- iii) The Group has elected not to apply AASB 121 "The Effects of Changes in Foreign Exchange Rates" to the cumulative translation differences at the date of transition to AIFRS. This will result in the foreign currency translation reserve balance at 1 January 2004 to be transferred to opening retained earnings. Any gain or loss on a subsequent disposal of any foreign operation shall exclude translation differences that arose before the date of transition and shall include later translation differences.
- iv) The Group has elected to defer the application of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement". As a result of the deferral, the opening retained earnings at 1 January 2005 has been adjusted to account for the application of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement" as at that date. Refer Note 3(e) for the reconciliation between 31 December 2004 closing balance and 1 January 2005 opening balance.

<sup>(iii)</sup> The balance sheet liability method of accounting for income taxes is required under AASB 112 "Income Taxes". A deferred tax liability is recognised for depreciation allowances for tax purposes and revaluations of investment properties. Under AGAAP, depreciation allowances for tax purposes and revaluation of investment properties did not have an impact on the tax expense in the income statement. A liability was only recognised once there was an intention to sell the investment property and the sale would give rise to a tax obligation.

<sup>(i)</sup> AASB 139 "Financial Instruments" does not allow hedge accounting for derivatives entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's function currency. These derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

Under AGAAP gains and losses on foreign currency derivatives were deferred and recorded with the underlying transactions being hedged. For hedges of foreign currency revenues, gains and losses were reflected in the income statement as the underlying foreign currency revenues were recognised.

<sup>(ii)</sup> Interest rate derivatives are considered to be ineffective as they do not meet the hedge effectiveness criteria under AASB 139 "Financial Instruments", accordingly these derivatives are measured at fair value and the gains and losses are recorded in the income statement. Under AGAAP, interest rate derivatives were accounted for on an accrual basis.

<sup>(iii)</sup> All AGAAP minority interests except for the CPT have been reclassified as debt and related earnings classified as interest expense in accordance with AASB 132 "Financial Instruments: Disclosure and Presentation". All convertible debt instruments are recorded at fair value under AIFRS. The fair value is based on the conversion value at balance date.

**WESTFIELD TRUST**  
**COMPRISING WESTFIELD TRUST AND ITS CONTROLLED ENTITIES**  
**INDEPENDENT AUDIT REPORT**  
to the Members of Westfield Trust

**Scope**

*The financial report and directors' responsibility*

The financial report comprises the balance sheet, income statement, cash flow statement, statement of changes in equity and accompanying notes to the financial statements for the consolidated entity comprising both Westfield Trust (the Trust) and the entities it controlled during the period, and the directors' declaration for the Trust, for the period ended 30 June 2005.

The directors of Westfield Management Limited, the Responsible Entity of the Trust, are responsible for preparing a financial report that gives a true and fair view of the financial position and performance of the consolidated entity, and that complies with Accounting Standard AASB 134 "Interim Financial Reporting", in accordance with the Corporations Act 2001. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

*Audit approach*

We conducted an independent audit of the financial report in order to express an opinion on it to the unitholders of the Trust and in order for the Trust to lodge the financial report with the Australian Stock Exchange and the Australian Securities and Investments Commission. Our audit was conducted in accordance with Australian Auditing Standards in order to provide reasonable assurance as to whether the financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

We performed procedures to assess whether in all material respects the financial report presents fairly, in accordance with the Corporations Act 2001, including compliance with Accounting Standard AASB 134 "Interim Financial Reporting", and other mandatory financial reporting requirements in Australia, a view which is consistent with our understanding of the consolidated entity's financial position, and of its performance as represented by the results of its operations and cash flows.

We formed our audit opinion on the basis of these procedures, which included:

- examining, on a test basis, information to provide evidence supporting the amounts and disclosures in the financial report, and
- assessing the appropriateness of the accounting policies and disclosures used and the reasonableness of significant accounting estimates made by the directors.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our audit was not designed to provide assurance on internal controls.

We performed procedures to assess whether the substance of business transactions was accurately reflected in the financial report. These and our other procedures did not include consideration or judgement of the appropriateness or reasonableness of the business plans or strategies adopted by the directors and management of the Responsible Entity of the Trust.

**Independence**

We are independent of the Trust, and have met the independence requirements of Australian professional ethical pronouncements and the Corporations Act 2001. We have given to the director's of Westfield Management Limited, a written Auditor's Independence Declaration a copy of which is included in the Directors' Report. In addition to our audit of the financial report, we were engaged to undertake other services. The provision of these services has not impaired our independence.

**Audit Opinion**

In our opinion, the financial report of the consolidated entity comprising Westfield Trust and the entities it controlled during the period is in accordance with:

- (a) the Corporations Act 2001, including:
  - (i) giving a true and fair view of the financial position of the consolidated entity at 30 June 2005 and of its performance for the period ended on that date; and
  - (ii) complying with Accounting Standard AASB 134 "Interim Financial Reporting" and the Corporations Regulations 2001; and
- (b) other mandatory financial reporting requirements in Australia.

**NOTES TO THE FINANCIAL STATEMENTS**  
for the half year ended 30 June 2005

**1 BASIS OF PREPARATION OF THE HALF YEAR FINANCIAL REPORT**

**(a) Statement of Compliance with Australian Equivalents to International Financial Reporting Standards**

This interim financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards ("AIFRS"). Compliance with AIFRS ensures that the financial report, comprising the financial statements and the notes thereto, complies with International Financial Reporting Standards.

This is the first financial report prepared based on AIFRS. The date of transition of AIFRS is 1 January 2004, accordingly the financial information for the half year ended 30 June 2004 and the year ended 31 December 2004 have been restated. A summary of the significant accounting policies under AIFRS are disclosed in Note 2 below.

Note 3 includes reconciliations between previously reported Australian Generally Accepted Accounting Principles as at 31 December 2004 ("AGAAP") to AIFRS including:

- a reconciliation between AGAAP and AIFRS equity as at 1 January 2004, 30 June 2004 and 31 December 2004; and
- a reconciliation between AGAAP and AIFRS profit for the half year ended 30 June 2004 and full year ended 31 December 2004.

**(b) Interim Reporting**

The interim financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the income statement, balance sheet and financing and investing activities of the consolidated entity as the full financial report.

The interim financial report should be read in conjunction with the annual financial report of WAT as at 31 December 2004, which was prepared based on Australian Accounting Standards applicable before 1 January 2005.

It is also recommended that the interim financial report be considered together with any public announcements made by the Westfield Group during the half year ended 30 June 2005 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

**(c) Basis of Accounting**

The interim financial report is a general-purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, applicable Accounting Standards including AASB 134 "Interim Financial Reporting" and other mandatory professional reporting requirements. The interim financial report has also been prepared on a historical cost basis, except for investment properties, derivative financial instruments and available for sale financial assets that have been measured at fair value.

For the purpose of preparing the interim financial report, the half year has been treated as a discrete reporting period.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**(a) Listed Property Trust Units**

WAT has had its constitution amended at its members' meeting on 12 May 2005. The amendment was the removal of the finite maximum term, which allows the unitholders' funds to remain as equity in accordance with AASB 132 "Financial Instruments: Presentation and Disclosure". The Group has deferred the adoption of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement" to 1 January 2005. Accordingly, AASB 132 and 139 have not been applied to the comparatives and WAT's units have been accounted for as equity.

**(b) Consolidation and classification**

The Westfield Group was established in July 2004 by the stapling of securities of each of Westfield Holdings Limited ("WHL"), Westfield Trust ("WT") and WAT. The securities trade as one security on the Australian Stock Exchange under the code WDC. The stapling transaction is referred to as the "Merger".

The consolidated financial report comprises the financial statements and notes to the financial statements of WAT (the "Parent Entity"), and each of its controlled entities as from the date the Parent Entity obtained control until such time control ceased. The Parent Entity and controlled entities are collectively referred to as "the Group". Where entities adopt accounting policies which differ from those of the Parent Entity, adjustments have been made so as to achieve consistency within the Group.

In preparing the consolidated financial statements all inter-entity transactions and balances, including unrealised profits arising from intra group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered. Minority interests from 1 January 2004 to 31 December 2004 represents interests in Westfield America Inc ("WEA") not held by the Group.

for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

*i) Joint Ventures*

*Joint venture entities*

The Group has significant co-ownership interests in a number of properties through property partnerships or trusts. These joint venture entities are accounted for using the equity method of accounting.

The Group and its joint venture entities use consistent accounting policies. Investment in joint venture entities are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the joint venture entities. The consolidated income statement reflects the Group's share of the results of operations of the joint venture entity.

*ii) Associates*

Where the Group exerts significant influence but not control, equity accounting is applied. The Group and its associates use consistent accounting policies. Investment in the associates are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the associates. The consolidated income statement reflects the Group's share of the results of operations of the associate. Where there has been a change recognised directly in the associate's equity, the Group recognises its share of any changes and discloses this, when applicable in the consolidated financial statements.

*iii) Controlled entities*

Where an entity either began or ceased to be a controlled entity during the reporting period, the results are included only from the date control commenced or up to the date control ceased. Minority interests are shown as a separate item in the consolidated financial statements.

Incremental interests acquired in controlled entities are reflected at their fair values. Adjustments have been made to the relevant equity interests to reflect any differences between the purchase price and the fair value. Adjustments have also been made to each class of equity interest to reflect the proportionate ownership interests.

In May 2002, WAT together with Simon Property Group ("Simon") and The Rouse Company ("Rouse"), acquired the assets and liabilities of Rodamco North America, N.V. ("RNA"). The Group's economic interest (of 43.3% by value) is represented by a 52.7% equity ownership of Head Acquisition LP which has been accounted for in accordance with the substance of the contractual agreements. Properties where the Group has 100% economic ownership have been consolidated. Other retail and property investments and property where the Group has significant influence have been equity accounted.

**(c) Investment properties**

The Group's investment properties include freehold and leasehold land, buildings, leasehold improvements, construction and development projects.

Land and buildings are considered as having the function of an investment and therefore are regarded as a composite asset, the overall value of which is influenced by many factors, the most prominent being income yield, rather than by the diminution in value of the building content due to effluxion of time. Accordingly, the buildings and all components thereof, including integral plant and equipment, are not depreciated.

Initially, investment properties are measured at cost including transaction costs. Subsequent to initial recognition, the Group's portfolio of investment properties is stated at fair value. Gains and losses arising from changes in the fair values of investment properties are included in the income statement in the year in which they arise. Any gains or losses on the sale of an investment property are recognised in the income statement in the year of sale.

Amounts capitalised to construction and development projects include the cost of sundry acquisitions and development costs in respect of qualifying assets and borrowing costs during development.

At each reporting date, the carrying value of the portfolio of investment properties is assessed by the Directors and where the carrying value differ materially from the Directors' assessment of fair value, an adjustment to the carrying value is recorded as appropriate.

The Directors' assessment of fair value of each investment property is confirmed by annual independent valuations conducted on a rolling basis. In determining the fair value, the capitalisation of net income method and the discounting of future cash flows to their present value have been used.

**(d) Other investments**

Unlisted investments are stated at fair value of the Group's interest in the underlying assets or cost.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(e) Foreign currencies**

*i) Translation of foreign currency transactions*

The functional and presentation currencies of the Parent Entity is Australian dollars. The functional currency of its entities in the United States is United States dollars. The presentation currency of the overseas entities is Australian dollars to enable the consolidated financial statements of the Group to be reported in a common currency.

Foreign currency transactions are converted to Australian dollars at exchange rates ruling at the date of those transactions. Amounts payable and receivable in foreign currency at balance date are translated to Australian dollars at exchange rates ruling at that date. Exchange differences arising from amounts payable and receivable are treated as operating revenue or expense in the period in which they arise, except as noted below.

*ii) Translation of accounts of foreign operations*

The balance sheet of foreign subsidiaries and equity accounted associates are translated at exchange rates ruling at balance date and the income statement of foreign subsidiaries and equity accounted associates are translated at average exchange rates for the period. Exchange differences arising on translation of the interests in foreign operations and equity accounted associates are taken directly to the Foreign Currency Translation Reserve. On consolidation, exchange differences and the related tax effect on loans and cross currency swaps denominated in foreign currencies, which hedge net investments in foreign operations and equity accounted associates are taken directly to the Foreign Currency Translation Reserve.

**(f) Revenue from continuing operations**

Revenues from rents and other property income are brought to account on an accruals basis and, if not received at balance date, are reflected in the balance sheet as receivables and are carried at fair value. Recoveries from tenants are recognised as income in the year the applicable costs are accrued. Profits from the sale of property investments are recognised upon settlement and after contractual duties are completed.

Certain tenant allowances that are classified as lease incentives are recorded as a separate asset and amortised over the term of the lease. The amortisation is recorded against property income.

All other revenues are recognised on an accruals basis.

**(g) Expenses from continuing operations**

Expenses from ordinary activities including rates, taxes and other outgoings, are brought to account on an accruals basis and any related payables are carried at cost. All other expenses are brought to account on an accruals basis.

**(h) Taxation**

The Group comprises taxable and non taxable entities. A liability for current and deferred taxation and tax expense is only recognised in respect of taxable entities that are subject to taxation as set out below.

Under current Australian income tax legislation, WAT is not liable to Australian income tax, including capital gains tax, provided that Members are presently entitled to the income of the Trust as determined in accordance with WAT's constitution.

Westfield America, Inc. ("WEA"), is a Real Estate Investment Trust ("REIT") for United States income tax purposes. To maintain its REIT status, WEA is required to distribute at least 90% of its taxable income to shareholders and meet certain asset and income tests as well as certain other requirements. As a REIT, WEA will generally not be liable for federal and state income taxes in the United States, provided it satisfies the necessary requirements and distributes 100% of its taxable income to its shareholders. Dividends paid by WEA to WAT are subject to United States dividend withholding tax.

Under current Australian income tax legislation, Members of WAT may be entitled to receive a foreign tax credit for United States withholding tax deducted from dividends paid to WAT by WEA.

Deferred tax is the tax expected to be payable or recoverable, by the entity, on differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised through continued use or the liability is settled, based on tax rates (and tax laws) that have been enacted at the balance sheet date. Income taxes related to items recognised directly in equity are recognised in equity and not in the income statement.

**(i) Goodwill and deferred tax on property acquisitions**

Goodwill on acquisition is initially measured at cost being the excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses and is not amortised.

The excess of the cost over the net fair value for the Group generally arises as a result of the recognition of deferred taxes based on the difference between the tax cost base and the fair value of net assets acquired. The deferred tax liability recognised at nominal value on acquisition of property businesses generally arises from the recognition of built in capital gains on those properties. Any resultant goodwill which arises from the recognition of these deferred tax liabilities is assessed for impairment. Impairment usually arises when the nominal value of deferred taxes on built in capital gains exceeds the fair value of those taxes. Any impairment write down is charged to the income statement subsequent to acquisition.

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(j) Financing costs**

Financing costs include interest, amortisation of discounts or premiums relating to borrowings and other costs incurred in connection with the arrangement of borrowings. Financing costs are expensed as incurred unless they relate to a qualifying asset. A qualifying asset is an asset which generally takes more than 12 months to get ready for its intended use or sale. In these circumstances, the financing costs are capitalised to the cost of the asset. Where funds are borrowed by the Group for the acquisition or construction of a qualifying asset, the amount of financing costs capitalised are those incurred in relation to that borrowing. Refer to note 2(n) for other items included in financing costs.

**(k) Leases**

Leases are classified at their inception as either operating or finance leases based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

*(i) Operating leases*

The minimum lease payments of operating leases, where the lessor effectively retains substantially all of the risks and benefits of ownership of the leased item, are recognised as an expense on an accruals basis. Ground rent obligations for leasehold property that meets the definition of an investment property are accounted for as a finance lease.

*(ii) Finance leases*

Leases which effectively transfer substantially all of the risks and benefits incidental to ownership of the leased item to the Group are capitalised at the present value of the minimum lease payments under lease and are disclosed as an asset or investment property.

Capitalised lease assets are depreciated over the shorter of the estimated useful life of the assets and the lease term. Minimum lease payments are allocated between interest expense and reduction of the lease liability.

**(l) Contributed equity**

Issued and paid up capital is recognised at the fair value of the consideration received by the Group. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received.

**(m) Cash flows**

Cash on hand, at bank and short-term deposits are stated at nominal value. For the purposes of the cash flow statement, cash includes cash on hand and at bank, short term money market deposits and bank accepted bills of exchange readily convertible to cash, net of bank overdrafts and short term loans. Bank overdrafts are carried at the principal amount. Interest is charged as an expense as it accrues.

**(n) Derivative and other financial instruments**

The Group's activities expose it to changes in interest rates and foreign exchange rates. There are policies and limits in respect of the use of derivative and other financial instruments to hedge cash flows subject to interest rate and currency risks.

There is a comprehensive hedging program implemented by the Group that is used to manage interest and exchange rate risk. Derivatives are not entered into for speculative purposes and the hedging policies are approved and monitored by the Board. Accounting standards however, include onerous documentation, designation and effectiveness requirements before a derivative financial instrument can qualify for hedge accounting. The Group's treasury transactions are undertaken to achieve economic outcomes in line with its treasury policy. The AIFRS documentation, designation and effectiveness requirements cannot be met in all circumstances. As a result all derivatives other than cross currency swaps that hedge investments in foreign operations do not qualify for hedge accounting and are recorded at fair value through the profit and loss account.

The fair value of forward exchange contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of interest rate swap contracts is determined by reference to market values for similar instruments.

The accounting policies adopted in relation to material financial instruments are detailed as follows:

*i) Financial assets*

*Receivables*

Trade and other receivables are carried at amortised cost, less provision for doubtful debts, and are generally due within 30 days.

*Other loans*

Loans are carried at cost. Interest is credited as income on an accruals basis.

*ii) Financial liabilities*

*Payables*

Trade and sundry creditors are carried at amortised cost, and are generally payable within 60 days.

*Interest bearing liabilities*

Interest bearing liabilities are carried at amortised cost or at their fair value at the time of acquisition in the case of assumed liabilities. Interest is charged as an expense on an accruals basis.

for the half year ended 30 June 2005

**2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

**(n) Derivative and other financial instruments (continued)**

*ii) Financial liabilities (continued)*

*Other financial liabilities*

Other financial liabilities include preference shares and convertible debt. Where there is a minimum distribution entitlement and/or the redemption terms include the settlement for cash on redemption the instrument is classified as a derivative and is fair valued through the income statement.

*iii) Interest rate swaps*

The Group enters into interest rate swap agreements that are used to convert certain variable interest rate borrowings to fixed interest rates. The swaps are entered into with the objective of hedging the risk of interest rate fluctuations in respect of underlying borrowings.

Derivatives entered into to reduce exposures to fluctuations in floating interest rates may be accounted for as cash flow hedges provided the hedge designation, documentation and effectiveness tests can be met. If these tests are satisfied then the hedging derivative is measured at fair value and gains or losses are reflected directly in equity until the hedged transaction occurs, when they are released to the income statement. To the extent that the hedges do not qualify for hedge accounting then gains or losses arising from changes in fair value is reflected in the income statement immediately.

*iv) Cross currency swaps and forward exchange contracts*

The Group enters into cross currency swaps and forward exchange contracts where it agrees to buy or sell specified amounts of foreign currencies in the future at predetermined exchange rates. The objective is to minimise the risk of exchange rate fluctuation in respect of certain of its foreign currency denominated assets, liabilities, revenues and expenses. The Group only enters into derivative financial instruments to hedge certain underlying assets, liabilities, revenues and expenses.

The forward exchange contracts entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's functional currency do not qualify for hedge accounting. Accordingly, such derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

The foreign exchange exposure on net investments in foreign operations qualify for hedge accounting provided that the hedge designation, documentation and effectiveness tests are met. If these tests are satisfied then the hedging derivative is measured at fair value and gains and losses reflected in the foreign currency translation reserve. To the extent that the hedge does not qualify for hedge accounting then a corresponding portion of the gain or loss is reflected in the income statement.

*v) Disclosure of fair values*

Recognised financial assets and liabilities are recorded at balance date at their net fair values with the exception of investments in associates which are carried at cost plus post-acquisition changes in the Group's share of net assets of the associates, less any impairment in value.

Applicable market rates, values, prices and terms in respect of derivative and other financial instruments are set out in the notes to these Financial Statements.

**(o) Rounding**

In accordance with ASIC Class Order 98/0100, the amounts shown in the Financial Report have, unless otherwise indicated, been rounded to the nearest tenth of a million dollars. Amounts shown as 0.0 represent amounts less than \$50,000 that have been rounded down.

**3 IMPACT OF ADOPTING AIFRS**

**(a) AASB 1 transitional exemptions**

The Group has made its election to the transitional exemptions allowed by AASB 1 "First-time Adoption of Australian Equivalents to International Financial Reporting Standards" as follows:

- i) AASB 3 "Business Combinations"* was not applied retrospectively to business combinations undertaken before the date of transition to AIFRS.
- ii) AASB 2 "Share Based Payments"* is applied only to equity instruments granted after 7 November 2002 that had not vested on or before 1 January 2005.
- iii) The Group has elected not to apply AASB 121 "The Effects of Changes in Foreign Exchange Rates"* to the cumulative translation differences at the date of transition to AIFRS. This will result in the foreign currency translation reserve balance at 1 January 2004 being transferred to opening retained earnings. Any gain or loss on a subsequent disposal of any foreign operation shall exclude translation differences that arose before the date of transition and shall include later translation differences.
- iv) The Group has elected to defer the application of AASB 132 "Financial Instruments: Presentation and Disclosure"* and AASB 139 "Financial Instruments: Recognition and Measurement". As a result of the deferral, the opening retained earnings at 1 January 2005 has been adjusted to account for the application of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement" as at that date. Refer note 3(e) for the reconciliation between the 31 December 2004 closing balance and the 1 January 2005 opening balance.

<sup>(i)</sup> AASB 139 "Financial Instruments" does not allow hedge accounting for derivatives entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's function currency. These derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

Under AGAAP gains and losses on foreign currency derivatives were deferred and recorded with the underlying transactions being hedged. For hedges of foreign currency revenues, gains and losses were reflected in the income statement as the underlying foreign currency revenues were recognised.

<sup>(ii)</sup> Interest rate derivatives are considered to be ineffective as they do not meet the hedge effectiveness criteria under AASB 139 "Financial Instruments", accordingly these derivatives are measured at fair value and the gains and losses are recorded in the income statement. Under AGAAP, interest rate derivatives were accounted for on an accrual basis.

<sup>(iii)</sup> All AGAAP minority interests have been reclassified as debt and related earnings classified as interest expense in accordance with AASB 132 "Financial Instruments: Disclosure and Presentation". All convertible debt instruments are recorded at fair value under AIFRS. The fair value is based on the conversion value at balance date.

**WESTFIELD AMERICA TRUST**  
**COMPRISING WESTFIELD AMERICA TRUST AND ITS CONTROLLED ENTITIES**  
**INDEPENDENT AUDIT REPORT**  
to the Members of Westfield America Trust

**Scope**

*The financial report and directors' responsibility*

The financial report comprises the balance sheet, income statement, cash flow statement, statement of changes in equity and accompanying notes to the financial statements for the consolidated entity comprising both Westfield America Trust (the Trust) and the entities it controlled during the period, and the directors' declaration for the Trust, for the period ended 30 June 2005.

The directors of Westfield America Management Limited, the Responsible Entity of the Trust, are responsible for preparing a financial report that gives a true and fair view of the financial position and performance of the consolidated entity, and that complies with Accounting Standard AASB 134 "Interim Financial Reporting", in accordance with the Corporations Act 2001. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

*Audit approach*

We conducted an independent audit of the financial report in order to express an opinion on it to the unitholders of the Trust and in order for the Trust to lodge the financial report with the Australian Stock Exchange and the Australian Securities and Investments Commission. Our audit was conducted in accordance with Australian Auditing Standards in order to provide reasonable assurance as to whether the financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

We performed procedures to assess whether in all material respects the financial report presents fairly, in accordance with the Corporations Act 2001, including compliance with Accounting Standard AASB 134 "Interim Financial Reporting", and other mandatory financial reporting requirements in Australia, a view which is consistent with our understanding of the consolidated entity's financial position, and of its performance as represented by the results of its operations and cash flows.

We formed our audit opinion on the basis of these procedures, which included:

- examining, on a test basis, information to provide evidence supporting the amounts and disclosures in the financial report, and
- assessing the appropriateness of the accounting policies and disclosures used and the reasonableness of significant accounting estimates made by the directors.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our audit was not designed to provide assurance on internal controls.

We performed procedures to assess whether the substance of business transactions was accurately reflected in the financial report. These and our other procedures did not include consideration or judgement of the appropriateness or reasonableness of the business plans or strategies adopted by the directors and management of the Responsible Entity of the Trust.

**Independence**

We are independent of the Trust, and have met the independence requirements of Australian professional ethical pronouncements and the Corporations Act 2001. We have given to the directors of Westfield America Management Limited, a written Auditor's Independence Declaration a copy of which is included in the Directors' Report. In addition to our audit of the financial report, we were engaged to undertake other services. The provision of these services has not impaired our independence.

**Audit Opinion**

In our opinion, the financial report of the consolidated entity comprising Westfield America Trust and the entities it controlled during the period is in accordance with:

- (a) the Corporations Act 2001, including:
  - (i) giving a true and fair view of the financial position of the consolidated entity at 30 June 2005 and of its performance for the period ended on that date; and
  - (ii) complying with Accounting Standard AASB 134 "Interim Financial Reporting" and the Corporations Regulations 2001;
- (b) other mandatory financial reporting requirements in Australia.

2005 SEP 18 A 11:21

**WESTFIELD GROUP ANNOUNCES FIRST HALF DISTRIBUTION OF  
A\$873.6 MILLION IN LINE WITH FORECAST**

OFFICE OF INTERNATIONAL  
CORPORATE FINANCE

The Westfield Group (ASX: WDC) today announced its first result under the new International Financial Reporting Standards (A-IFRS), reporting a net profit of A\$1,534.5 million for the six months to 30 June 2005 including net property income, before revaluations, of A\$1,169 million. The distribution for the period was A\$873.6 million, representing 51.07 cents per stapled security.

The distribution is in line with forecasts contained in the Explanatory Memorandum (dated 25 May 2004) for the merger of Westfield Holdings, Westfield Trust and Westfield America Trust, completed in July 2004.

Managing directors, Peter Lowy and Steven Lowy, said that the underlying strength and stability of the Group's earnings is largely attributable to the high quality of the Group's shopping centre portfolio in established markets around the world.

The Group's shopping centre operations in all markets continue to perform well. Specialty retail sales continue to show positive signs in the United States, Australian and New Zealand markets with the United Kingdom remaining relatively flat. In particular, in the United States, the Group has reported strong performances on both the East and West coasts.

Leasing also continues to be strong in all markets with Australia, New Zealand and the United Kingdom at almost full occupancy. In the United States the portfolio is currently 93.5% leased compared to 92.5% at the same time last year.

As at 30 June 2005, the Westfield Group had interests in 126 shopping centres with a value of approximately A\$46.3 billion. The centres accommodate approximately 20,900 retailers and comprise approximately 10.2 million square metres of retail space.

Other highlights for the period include:

- Commencement of 5 additional developments with an aggregate project cost of A\$1.5 billion. The Group's current development program with 17 projects under construction for an aggregate project cost of A\$6.7 billion (Westfield Group share: A\$4.1 billion), is larger than at any time in the Group's history;
- Acquisition of A\$1.2 billion of shopping centre assets:
  - A\$650 million in Australia;
  - US\$320 million in the United States; and
  - £65 million in the United Kingdom.

media release

- Gross value of investments under management increased by 10.5% to A\$46.3 billion. The increased value of the Group's shopping centre portfolio has been driven by revaluations, the acquisition of new properties and the completion of redevelopments.
- Further diversification of the Group's debt funding sources with a debut issue in the Eurobond market raising the equivalent of A\$2.35 billion.

#### Outlook

The directors reconfirm the distribution forecasts contained in the Explanatory Memorandum for the periods to 30 June 2006 as well as the financial year distribution forecast to 31 December 2005 of 106.5 cents per stapled security.

It has been another positive period for the Group with the strong operating results, ongoing development, acquisition and financing transactions undertaken over the last six months further strengthening the platform for future income and capital growth.

**ENDS**

Note: As the merger to form the Westfield Group occurred in July 2004, there are no comparable results for the Group in respect of the half year ended 30 June 2004.

| Distribution per Security | 51.07 cents | Gearing                   | 39.8% <sup>2</sup>   |

The Group's first result following the introduction of the International Financial Reporting Standards (A-IFRS), reported a net profit of \$1,534.5 million for the six months to 30 June 2005. The distribution of \$873.6 million (51.07 cents per security) is in line with merger forecasts.

It is important to highlight that, due to seasonality, foreign exchange movements and more importantly, the application of A-IFRS, the results for the 6 months to June 2005 do not directly reflect the underlying operating performance of the Group when compared with the results for the 6 months to December 2004. For example, the impact on the Income Statement of property revaluations (required to be included following the introduction of A-IFRS) are significant in each period (ie. June '05 - A\$1.2 billion and December '04 - \$2.8 billion).

Earnings per security is 90.36 cents. The Group's distribution for the period is 51.07 cents per security and the distribution forecast for the 12 months to 31 December 2005 is confirmed at 106.5 cents per security.

Total assets have increased since 31 December 2004 from \$33.9 billion to \$36.4 billion. During the same period, the gross value of investments under management rose by 10.5% from \$41.9 billion to \$46.3 billion. The increased value of the Group's shopping centre portfolio for the period has been driven by revaluations, the acquisition of new properties and the completion of redevelopments. As a result, the NTA per security at 30 June 2005, excluding the impact of the application of A-IFRS is \$11.28.

1. NTA per security after excluding the impact of the application of A-IFRS.
2. Gearing as measured under the Group's global bond offerings.

#### Interim reports

The attached interim financial report has been prepared for the first time under Australian equivalents to International Financial Reporting Standards ("AIFRS"). The prior period comparatives have been restated to comply with AIFRS. This interim financial report should be read in conjunction with the annual financial report of the Westfield Group as at 31 December 2004, which was prepared based on Australian Accounting Standards applicable before 1 January 2005. It is also recommended that the interim financial report be considered together with any public announcements made by the Westfield Group during the half year ended 30 June 2005 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

#### Comparatives

The Westfield Group was established in July 2004 and changed its year end to 31 December. There is no comparative half year period for the six months ended 30 June 2004. The accounting standards require the Westfield Group results for the six months ended 31 December 2004 to be included as the comparative for the six months ended 30 June 2005. The results for the six month period to 30 June 2005 may not be comparable to the results for the six month period to 31 December 2004 due to:

- (1) seasonality in the retail market between the June and December half year whereby retail sales and rental income including percentage rent are generally higher in the December half year, and
- (2) the impact of the movement in the average exchange rates applied in the translation of foreign currency denominated income and expenses (30 June 2005: US\$0.7727, £0.4125, NZ\$1.0792, 31 December 2004: US\$0.7326, £0.3977, NZ\$1.0845).

- (a) seasonality in the retail market between the June and December half year whereby retail sales and rental income including percentage rent are generally higher in the December half year, and
- (b) the impact of the movement in the average exchange rates applied in the translation of foreign currency denominated income and expenses (30 June 2005: US\$0.7727, £0.4125, NZ\$1.0792, 31 December 2004: US\$0.7326, £0.3977, NZ\$1.0845).

## **NOTES TO THE FINANCIAL STATEMENTS**

**for the half year ended 30 June 2005**

### **1 BASIS OF PREPARATION OF THE HALF YEAR FINANCIAL REPORT**

#### **(a) Statement of Compliance with Australian Equivalents to International Financial Reporting Standards**

This interim financial report complies with Australian Accounting Standards, which include Australian equivalents to International Financial Reporting Standards ("AIFRS"). Compliance with AIFRS ensures that the financial report, comprising the financial statements and the notes thereto, complies with International Financial Reporting Standards.

This is the first financial report prepared based on AIFRS. Accordingly, the financial information for the prior period comparative, being the shortened financial year ended 31 December 2004, has been restated. A summary of the significant accounting policies of the Westfield Group under AIFRS are disclosed in Note 2 below.

Note 3 includes reconciliations between previously reported Australian Generally Accepted Accounting Principles as at 31 December 2004 ("AGAAP") to AIFRS including:

- a reconciliation between AGAAP and AIFRS equity as at 1 July 2004 and 31 December 2004; and
- a reconciliation between AGAAP and AIFRS profit for the shortened financial year ended 31 December 2004.

#### **(b) Interim reporting**

The interim financial report does not include all notes of the type normally included within the annual financial report and therefore cannot be expected to provide as full an understanding of the income statement, balance sheet and financing and investing activities of the consolidated entity as the full financial report.

The interim financial report should be read in conjunction with the annual financial report of the Westfield Group as at 31 December 2004, which was prepared based on Australian Accounting Standards applicable before 1 January 2005.

It is also recommended that the interim financial report be considered together with any public announcements made by the Westfield Group during the half year ended 30 June 2005 in accordance with the continuous disclosure obligations arising under the Corporations Act 2001.

#### **(c) Comparative information**

By an order dated 21 May 2004, made by ASIC pursuant to subsection 340(1) of the Act, the Directors of the Parent Company have been relieved from compliance with subsection 323D(2)(b) and 323D(5) of the Act. Accordingly, the Parent Company has changed its financial year end to 31 December and has complied with Chapter 2M of the Act in respect of the period 1 July 2004 to 31 December 2004 ("the Shortened Financial Year"), as if the Shortened Financial Year was a financial year.

As the Westfield Group was established in July 2004 and changed its year end to 31 December, there is no comparative half year period for the six months ended 30 June 2004. The accounting standards require the Westfield Group results for the six months ended 31 December 2004 be included as the comparative for the six months ended 30 June 2005.

Where applicable, certain comparative figures are restated in order to comply with the current period's presentation of the financial statements.

#### **(d) Basis of Accounting**

The interim financial report is a general purpose financial report, which has been prepared in accordance with the requirements of the Corporations Act 2001, applicable Accounting Standards including AASB 134 "Interim Financial Reporting" and other mandatory professional reporting requirements. The interim financial report has also been prepared on a historical cost basis, except for investment properties, derivative financial instruments and available for sale financial assets that have been measured at fair value.

For the purpose of preparing the interim financial report, the half year has been treated as a discrete reporting period.

### **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

#### **(a) Accounting for the Westfield Group**

The Westfield Group was established in July 2004 by the stapling of securities of each of the Parent Company, Westfield Trust ("WT") and Westfield America Trust ("WAT"). The securities trade as one security on the Australian Stock Exchange under the code WDC. The stapling transaction is referred to as the "Merger".

### **NOTES TO THE FINANCIAL STATEMENTS**

**for the half year ended 30 June 2005**

#### **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

##### **(a) Accounting for the Westfield Group (continued)**

As a result of the Merger the Parent Company, for accounting purposes, gained control of WT and WAT and has consolidated WT and WAT from 2 July 2004, being the date an order made by the Supreme Court of New South Wales approving the share scheme of arrangement of the Parent Company was lodged with ASIC. Accordingly, this transaction is accounted for as a business combination under AIFRS by consolidating the fair value of the net assets of WT and WAT.

This financial report has been prepared based upon a business combination by the Parent Company of WT and WAT and in recognition of the fact that the securities issued by the Parent Company, WT and WAT have been stapled and cannot be traded separately.

WT and WAT are included as part of equity attributable to members of the stapled group, in accordance with UIG 1013 "Consolidated Financial Reports in relation to Pre-Date-of-Transition Stapling Arrangements".

##### **(b) Listed Property Trust Units**

WT and WAT have had their constitutions amended at their respective members meetings on 12 May 2005. The amendment was the removal of the finite maximum term of each Trust, which allows the unitholders' funds to remain as equity in accordance with AASB 132 "Financial Instruments: Presentation and Disclosure". The Group had deferred the adoption of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement" to 1 January 2005. Accordingly, AASB 132 and 139 has not been applied to the comparatives and the Trust's units have been accounted for as equity.

##### **(c) Consolidation and classification**

The consolidated financial report comprise the financial statements and notes to the financial statements of the Parent Company, and each of its controlled entities which includes WT and WAT ("Subsidiaries") as from the date the Parent Company obtained control until such time control ceased. The Parent Company and Subsidiaries are collectively referred to as the economic entity known as the Westfield Group ("the Group"). Where entities adopt accounting policies which differ from those of the Parent Company, adjustments have been made so as to achieve consistency within the Westfield Group.

In preparing the consolidated Financial Statements all inter-entity transactions and balances, including unrealised profits arising from intra group transactions, have been eliminated in full. Unrealised losses are eliminated unless costs cannot be recovered. Minority interests for the period 1 January to 30 June 2005 represents interests in Carindale Property Trust ("CPT") not held by the Group.

###### *i) Synchronisation of Financial Year*

By an order dated 27 June 2005, made by ASIC pursuant to subsection 340(1) of the Act, the Directors of Parent Company have been relieved from compliance with subsection 323D(3) of the Act insofar as that subsection requires them to ensure the financial years of the controlled entity Carindale Property Trust, coincides with the financial year of Parent Company.

Notwithstanding that the financial year of CPT ends on 30 June, the consolidated Financial Statements have been made out so as to include the accounts for a period coinciding with the financial year of the Parent Company being 31 December.

###### *ii) Joint Ventures*

###### *Joint venture operations*

The Group has significant co-ownership interests in a number of properties through unincorporated joint ventures. These interests are held directly and jointly as tenants in common. The Group's proportionate share in the income, expenditure, assets and liabilities of property interests held as tenants in common have been included in their respective classifications in the financial report.

###### *Joint venture entities*

The Group has significant co-ownership interests in a number of properties through property partnerships or trusts. These joint venture entities are accounted for using the equity method of accounting.

The Group and its joint venture entities use consistent accounting policies. Investment in joint venture entities are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the joint venture entities. The consolidated income statement reflects the Group's share of the results of operations of the joint venture entity.

##### **(c) Consolidation and classification (continued)**

###### *iii) Associates*

Where the Group exerts significant influence but not control, equity accounting is applied. The Group and its associates use consistent accounting policies. Investment in the associates are carried in the consolidated balance sheet at cost plus post-acquisition changes in the Group's share of net assets of the associates. The consolidated income statement reflects the Group's share of the results of operations of the associate. Where there has been a change recognised directly in the associate's equity, the Group recognises its share of any changes and discloses this, when applicable in the consolidated financial statements.

###### *iv) Controlled entities*

Where an entity either began or ceased to be a controlled entity during the reporting period, the results are included only from the date control commenced or up to the date control ceased. Minority interests are shown as a separate item in the consolidated financial statements.

Incremental interests acquired in controlled entities are reflected at their fair values. Adjustments have been made to the relevant equity interests to reflect any differences between the purchase price and the fair value. Adjustments have also been made to each class of equity interest to reflect the proportionate ownership interests.

In May 2002, WAT together with Simon Property Group ("Simon") and The Rouse Company ("Rouse"), acquired the assets and liabilities of Rodamco North America, N.V. ("RNA"). The Westfield Group's economic interest (of 43.3% by value) is represented by a 52.7% equity ownership of Head Acquisition LP which has been accounted for in accordance with the substance of the contractual agreements. Properties where the Westfield Group has 100% economic ownership have been consolidated. Other retail and property investments and property where the Group has significant influence have been equity accounted.

##### **(d) Investment properties**

The Group's investment properties include freehold and leasehold land, buildings, leasehold improvements, construction and development projects.

Land and buildings are considered as having the function of an investment and therefore are regarded as a composite asset, the overall value of which is influenced by many factors, the most prominent being income yield, rather than by the diminution in value of the building content due to effluxion of time. Accordingly, the buildings and all components thereof, including integral plant and equipment, are not depreciated.

Initially, investment properties are measured at cost including transaction costs. Subsequent to initial recognition, the Group's portfolio of investment properties is stated at fair value. Gains and losses arising from changes in the fair values of investment properties are included in the income statement in the year in which they arise. Any gains or losses on the sale of an investment property are recognised in the income statement in the year of sale.

Amounts capitalised to construction and development projects include the cost of sundry acquisitions and development costs in respect of qualifying assets and borrowing costs during development.

At each reporting date, the carrying value of the portfolio of investment properties is assessed by the Directors and where the carrying value differs materially from the Directors' assessment of fair value, an adjustment to the carrying value is recorded as appropriate.

The Directors' assessment of fair value of each investment property is confirmed by annual independent valuations conducted on a rolling basis. In determining the fair value, the capitalisation of net income method and the discounting of future cash flows to their present value have been used.

##### **(e) Other investments**

Other investments are classified as available-for-sale. Listed investments in entities are stated at fair value based on their market values. Unlisted investments are stated at fair value of the Group's interest in the underlying assets or cost.

Gains or losses on available-for-sale investments are recognised as a separate component of equity until the investment is sold or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in the income statement.

Foreign currency transactions are converted to Australian dollars at exchange rates ruling at the date of those transactions. ##### **(g) Revenue from continuing operations**

Revenue from rents and other property income are brought to account on an accruals basis and, if not received at balance date, are reflected in the Balance Sheet as receivables and are carried at fair value. Recoveries from tenants are recognised as income in the year the applicable costs are accrued. Profits from the sale of property investments are recognised upon settlement and after contractual duties are completed.

Revenue from external parties for property development and construction is recognised on a percentage completion basis. Stage of completion is assessed by independent quantity surveyors. Revenue from property and funds management is recognised on an accruals basis, in accordance with the terms of the relevant management contracts.

Certain tenant allowances that are classified as lease incentives are recorded as a separate asset and amortised over the term of the lease. The amortisation is recorded against property income.

All other revenues are recognised on an accruals basis.

##### **(h) Expenses from continuing operations**

Expenses from ordinary activities including rates, taxes and other outgoings, are brought to account on an accruals basis and any related payables are carried at cost. All other expenses are brought to account on an accruals basis.

##### **(i) Taxation**

###### *i) Parent Company*

The Parent Company and its Australian resident wholly owned subsidiaries have formed a Tax Consolidation Group. Accordingly, the Parent Company has assumed the income tax assets, liabilities, expenses and revenues of the Tax Consolidation Group. However, the Parent Company has entered into tax funding arrangements with its Australian resident wholly owned subsidiaries, so that each subsidiary has agreed to pay or receive a tax equivalent amount to or from the Parent Company based on the net taxable amount or loss, including temporal differences, of the subsidiary at the current tax rate.

#### **(i) Taxation (continued)**

##### *ii) WT*

Under current Australian income tax legislation WT is not liable to Australian income tax, including capital gains tax, provided that Members are presently entitled to the income of the Trust as determined in accordance with WT's constitution. WT's New Zealand controlled entities are subject to New Zealand tax on their earnings. Dividends paid by those entities to WT are subject to New Zealand dividend withholding tax.

Under current Australian income tax legislation, holders of the stapled securities of the Westfield Group may be entitled to receive a foreign tax credit for New Zealand withholding tax deducted from dividends paid by WT's New Zealand controlled entities to WT.

##### *iii) WAT*

Under current Australian income tax legislation, WAT is not liable to Australian income tax, including capital gains tax, provided that Members are presently entitled to the income of the Trust as determined in accordance with WAT's constitution.

Westfield America, Inc. ("WEA"), is a Real Estate Investment Trust ("REIT") for United States income tax purposes. To maintain its REIT status, WEA is required to distribute at least 90% of its taxable income to shareholders and meet certain asset and income tests as well as certain other requirements. As a REIT, WEA will generally not be liable for federal and state income taxes in the United States, provided it satisfies the necessary requirements and distributes 100% of its taxable income to its shareholders. Dividends paid by WEA to WAT are subject to United States dividend withholding tax.

Under current Australian income tax legislation, holders of the stapled securities of the Westfield Group may be entitled to receive a foreign tax credit for United States withholding tax deducted from dividends paid to WAT by WEA.

##### *iv) General*

Deferred tax is the tax expected to be payable or recoverable, by taxable entities, on differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised through continued use or the liability is settled, based on tax rates (and tax laws) that have been enacted at the balance sheet date. Income taxes related to items recognised directly in equity are recognised in equity and not in the income statement.

#### **(j) Goodwill and deferred tax on acquisitions of property businesses**

Goodwill on acquisition is initially measured at cost being the excess of the cost of the business combination over the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities. Following initial recognition, goodwill is measured at cost less any accumulated impairment losses and is not amortised.

The excess of the cost over the net fair value for the Group generally arises as a result of the recognition of deferred taxes based on the difference between the tax cost base and the fair value of net assets acquired. The deferred tax liability recognised at nominal value on acquisition of property businesses generally arises from the recognition of built in capital gains on those properties. Any resultant goodwill which arises from the recognition of these deferred tax liabilities is assessed for impairment. Impairment usually arises when the nominal value of deferred taxes on built in capital gains exceeds the fair value of those taxes. Any impairment write down is charged to the income statement subsequent to acquisition.

#### **(k) Goods and Services Tax ("GST")**

Revenues, expenses and assets are recognised net of the amount of GST except where the GST incurred on purchase of goods and services is not recoverable from the tax authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable. Receivables and payables are stated with the amounts of GST included.

The net amount of GST payable or receivable to government authorities is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Cash Flows Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

## **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

### **(l) Financing costs**

Financing costs include interest, amortisation of discounts or premiums relating to borrowings and other costs incurred in connection with the arrangement of borrowings. Financing costs are expensed as incurred unless they relate to a qualifying asset. A qualifying asset is an asset which generally takes more than 12 months to get ready for its intended use or sale. In these circumstances, the financing costs are capitalised to the cost of the asset. Where funds are borrowed by the Group for the acquisition or construction of a qualifying asset, the amount of financing costs capitalised are those incurred in relation to that borrowing.

Refer to Note 2(s) for other items included in financing costs.

### **(m) Property development projects and construction contracts for external parties**

Property development projects for external parties are carried at the lower of cost or net realisable value. Profit on property development is recognised on a percentage completion basis. These property development projects are included in inventories and represent the value of work actually completed and are assessed in terms of the contract, and provision is made for losses, if any, anticipated.

### **(n) Depreciation and amortisation**

Fixed assets and deferred costs are carried at acquisition cost less depreciation and amortisation and any impairment in value. Depreciation and amortisation is applied over the estimated economic life using the straight line method from the date of acquisition or from the time the asset is ready for use. The estimated economic life of items in the asset class plant and equipment ranges from 3 to 15 years.

### **(o) Leases**

Leases are classified at their inception as either operating or finance leases based on the economic substance of the agreement so as to reflect the risks and benefits incidental to ownership.

#### **(i) Operating leases**

The minimum lease payments of operating leases, where the lessor effectively retains substantially all of the risks and benefits of ownership of the leased item, are recognised as an expense on an accruals basis. Ground rent obligations for leasehold property that meets the definition of an investment property are accounted for as a finance lease.

#### **(ii) Finance leases**

Leases which effectively transfer substantially all of the risks and benefits incidental to ownership of the leased item to the Group are capitalised at the present value of the minimum lease payments under lease and are disclosed as an asset or investment property.

Capitalised lease assets are depreciated over the shorter of the estimated useful life of the assets and the lease term. Minimum lease payments are allocated between interest expense and reduction of the lease liability.

### **(p) Employee benefits**

The liability for employees' benefits to wages, salaries, bonuses and annual leave is accrued to balance date based on the Group's present obligation to pay resulting from the employees' services provided. The liability for employees' benefits to long service leave is provided to balance date based on the present values of the estimated future cash flows to be paid by the Group resulting from the employees' services provided.

### **(q) Contributed equity**

Issued and paid up capital is recognised at the fair value of the consideration received by the Westfield Group. Any transaction costs arising on the issue of ordinary shares are recognised directly in equity as a reduction of the share proceeds received.

## **NOTES TO THE FINANCIAL STATEMENTS**

for the half year ended 30 June 2005

### **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### **(r) Cash flows**

Cash on hand, at bank and short term deposits are stated at nominal value. For the purposes of the Cash Flow Statement, cash includes cash on hand and at bank, short term money market deposits and bank accepted bills of exchange readily convertible to cash, net of bank overdrafts and short term loans. Bank overdrafts are carried at the principal amount. Interest is charged as an expense as it accrues.

#### **(s) Derivative and other financial instruments**

The Group's activities expose it to changes in interest rates and foreign exchange rates. The Group has policies and limits in respect of the use of derivative and other financial instruments to hedge cash flows subject to interest rate and currency risks.

There is a comprehensive hedging program implemented by the Group that is used to manage interest and exchange rate risk. Derivatives are not entered into for speculative purposes and the hedging policies are approved and monitored by the Board. Accounting standards however, include onerous documentation, designation and effectiveness requirements before a derivative financial instrument can qualify for hedge accounting. The Group's treasury transactions are undertaken to achieve economic outcomes in line with its treasury policy. The AIFRS documentation, designation and effectiveness requirements cannot be met in all circumstances. As a result all derivatives other than cross currency swaps that hedge investments in foreign operations do not qualify for hedge accounting and are recorded at fair value through the profit and loss account.

The fair value of forward exchange contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of interest rate swap contracts is determined by reference to market values for similar instruments.

The accounting policies adopted in relation to material financial instruments are detailed as follows:

##### *i) Financial assets*

###### *Receivables*

Trade and sundry debtors are carried at amortised cost, less provision for doubtful debts, and are due within 30 days.

##### *ii) Financial liabilities*

###### *Payables*

Trade and sundry creditors are carried at amortised cost, and are generally payable within 60 days.

###### *Interest bearing liabilities*

Interest bearing liabilities are carried at amortised cost or at their fair value at the time of acquisition in the case of assumed liabilities. Interest is charged as an expense on an accruals basis.

###### *Other financial liabilities*

Other financial liabilities include preference shares, trust units issued by subsidiaries with a fixed life and convertible debt. Where there is a minimum distribution entitlement and/or the redemption terms include the settlement for cash on redemption the instrument is classified as a derivative and is fair valued through the income statement.

##### *iii) Interest rate swaps*

The Group enters into interest rate swap agreements that are used to convert certain variable interest rate borrowings to fixed interest rates. The swaps are entered into with the objective of hedging the risk of interest rate fluctuations in respect of underlying borrowings.

Derivatives entered into to reduce exposures to fluctuations in floating interest rates may be accounted for as cash flow hedges provided the hedge designation, documentation and effectiveness tests can be met. If these tests are satisfied then the hedging derivative is measured at fair value and gains or losses are reflected directly in equity until the hedged transaction occurs, when they are released to the income statement. To the extent that the hedges do not qualify for hedge accounting then gains or losses arising from changes in fair value is reflected in the income statement immediately.

##### *iv) Cross currency swaps and forward exchange contracts*

The Group enters into cross currency swaps and forward exchange contracts where it agrees to buy or sell specified amounts of foreign currencies in the future at predetermined exchange rates. The objective is to minimise the risk of exchange rate fluctuation in respect of certain of its foreign currency denominated assets, liabilities, revenues and expenses. The Group only enters into derivative financial instruments to hedge certain underlying assets, liabilities, revenues and expenses.

### **NOTES TO THE FINANCIAL STATEMENTS**

for the half year ended 30 June 2005

#### **2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)**

##### **(s) Derivative and other financial instruments (continued)**

###### *iv) Cross currency swaps and forward exchange contracts (continued)*

The forward exchange contracts entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's functional currency do not qualify for hedge accounting. Accordingly, such derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

The foreign exchange exposure on net investments in foreign operations qualify for hedge accounting provided that the hedge designation, documentation and effectiveness tests are met. If these tests are satisfied then the hedging derivative is measured at fair value and gains and losses reflected in the foreign currency translation reserve. To the extent that the hedge does not qualify for hedge accounting then a corresponding portion of the gain or loss is reflected in the income statement.

###### *v) Disclosure of fair values*

Recognised financial assets and liabilities are recorded at balance date at their net fair values with the exception of investments in associates which are carried at cost plus post-acquisition changes in the Westfield Group's share of net assets of the associates, less any impairment in value. Refer Note 2(c).

Applicable market rates, values, prices and terms in respect of derivative and other financial instruments are set out in the notes to these financial statements.

##### **(t) Rounding**

In accordance with ASIC Class Order 98/0100, the amounts shown in the Financial Report have, unless otherwise indicated, been rounded to the nearest tenth of a million dollars. Amounts shown as 0.0 represent amounts less than \$50,000 that have been rounded down.

#### **3 IMPACT OF ADOPTING AIFRS**

##### **(a) AASB 1 transitional exemptions**

The Group has made its election to the transitional exemptions allowed by AASB 1 "First-time Adoption of Australian Equivalents to International Financial Reporting Standards" as follows:

- i) AASB 3 "Business Combinations" was not applied retrospectively to business combinations undertaken before the date of transition to AIFRS.*
- ii) AASB 2 "Share Based Payments" is applied only to equity instruments granted after 7 November 2002 that had not vested on or before 1 January 2005.*
- iii) The Group has elected not to apply AASB 121 "The Effects of Changes in Foreign Exchange Rates" to the cumulative translation differences at the date of transition to AIFRS. This will result in the foreign currency translation reserve balance at 1 July 2004 being transferred to opening retained earnings. Any gain or loss on a subsequent disposal of any foreign operation shall exclude translation differences that arose before the date of transition and shall include later translation differences.*
- iv) The Group has elected to defer the application of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement". As a result of the deferral, the opening retained earnings at 1 January 2005 has been adjusted to account for the application of AASB 132 "Financial Instruments: Presentation and Disclosure" and AASB 139 "Financial Instruments: Recognition and Measurement" as at that date. Refer note 3(e) for the reconciliation between 31 December 2004 closing balance and 1 January 2005 opening balance.*

### 3 IMPACT OF ADOPTING AIFRS (continued)

#### (b) Reconciliation of profit after tax between AGAAP and AIFRS

|  | 31 Dec 04<br>\$million |
|--|------------------------|
| Profit after tax attributable to members as previously reported under AGAAP                                | 832.9                  |
| Investment property revaluations <sup>(i)</sup>  | 2,298.1                |
| Minority interest property revaluations <sup>(i)</sup>   | (141.2)                |
| Investment property revaluations attributable to equity accounted associates <sup>(i)</sup>                | 462.2                  |
| Deferred tax charge <sup>(ii)</sup>  | (358.4)                |
| Goodwill on acquisitions (due to the recognition of deferred tax liabilities) written off <sup>(iii)</sup> | (460.0)                |
| Other AIFRS adjustments  | (3.2)                  |
| <b>Profit after tax attributable to members under AIFRS</b>  | <b>2,630.4</b>         |

<sup>(i)</sup> AASB 140 "Investment Property" requires revaluation increment/decrement to be recognised through the income statement. Under AGAAP revaluation movements were recognised in the asset revaluation reserve.

<sup>(ii)</sup> The balance sheet liability method of accounting for income taxes is required under AASB 112 "Income Taxes". A deferred tax liability is recognised for depreciation allowances for tax purposes and revaluations of investment properties. Under AGAAP, depreciation allowances for tax purposes and revaluation of investment properties did not have an impact on the tax expense in the income statement. A liability was only recognised once there was an intention to sell the investment property and the sale would give rise to a tax obligation.

<sup>(iii)</sup> Deferred tax on acquisition has arisen with respect to the Group's acquisition of Duelguide plc under AASB 3 "Business Combinations". The excess of the purchase price over fair value is a result of the application of the balance sheet liability method of tax effect accounting for the Duelguide properties. This gives rise to goodwill which is considered unrecoverable and has been written off to income statement.

<sup>(i)</sup> A reconciliation of AGAAP to AIFRS at the date of the Merger.

<sup>(ii)</sup> The balance sheet liability method of accounting for income taxes is required under AASB 112 "Income Taxes". A deferred tax liability is recognised for depreciation allowances for tax purposes and revaluations of investment properties. Under AGAAP, depreciation allowances for tax purposes and revaluation of investment properties did not have an impact on the tax expense in the income statement. A liability was only recognised once there was an intention to sell the investment property and the sale would give rise to a tax obligation.

<sup>(iii)</sup> Deferred tax on acquisition has arisen with respect to the Group's acquisition of Duelguide plc under AASB 3 "Business Combinations". The excess of the purchase price over fair value is a result of the application of the balance sheet liability method of tax effect accounting for the Duelguide properties. This gives rise to goodwill which is considered unrecoverable and has been written off to income statement.

<sup>(iv)</sup> The Westfield Group's Executive Option Plan Trust is required to be consolidated under AIFRS.

#### (d) Cash flow Statement under AIFRS

|   | <b>15,981.1</b>                     |

<sup>(i)</sup> AASB 139 "Financial Instruments" does not allow hedge accounting for derivatives entered into to hedge the foreign exchange exposure relating to revenues denominated in a foreign operation's function currency. These derivatives are measured at fair value and gains and losses are reflected in the income statement as they arise.

Under AGAAP gains and losses on foreign currency derivatives were deferred and recorded with the underlying transactions being hedged. For hedges of foreign currency revenues, gains and losses were reflected in the income statement as the underlying foreign currency revenues were recognised.

<sup>(ii)</sup> Interest rate derivatives are considered to be ineffective as they do not meet the hedge effectiveness criteria under AASB 139 "Financial Instruments", accordingly these derivatives are measured at fair value and the gains and losses are recorded in the income statement. Under AGAAP, interest rate derivatives were accounted for on an accrual basis.

<sup>(iii)</sup> All AGAAP minority interests except for the Carindale Property Trust have been reclassified as debt and related earnings classified as interest expense in accordance with AASB 132 "Financial Instruments: Disclosure and Presentation". All convertible debt instruments are recorded at fair value under AIFRS. The fair value is based on the conversion value at balance date.

(i) All equity accounted property partnerships, trusts and companies operate solely as retail property investors.

(ii) The Group has a 75% economic interest in Broadmarsh. The Group has equal representation and voting rights on the Board of Broadmarsh resulting in joint control, and as a consequence, significant influence. Accordingly, Broadmarsh has been accounted for as an associate in accordance with AASB 131: Interest in Joint Ventures.

(iii) On 24 November 2004 DGL Acquisitions Limited ("DGL") acquired a 100% interest in Duelguide plc ("Duelguide"), the company which owns the former London listed Chelsfield plc ("Chelsfield"), for cash consideration totalling £585 million.

DGL is 50% owned by Westfield Group entities and 50% owned by R&M Investments (BVI) Limited ("R&M"), a company that is jointly owned by entities associated with Multiplex Limited and Messrs. David and Simon Reuben.

In an agreement dated 17 October 2004, the shareholders of DGL agreed to allocate the direct ownership of the assets and liabilities of Duelguide to the Westfield Group and R&M. It is anticipated that this allocation and associated restructure transactions will be implemented within 12 months of acquisition date.

On 18 May 2005 the Westfield Group agreed to purchase an additional 25% interest in Duelguide's White City development for £65 million from R&M, increasing its ownership of the White City development to 50%. Concurrently, the Westfield Group also agreed to acquire Chelsfield's £150 million White City land sale receivable and £70 million development funding deposit.

In accordance with the above, the Westfield Group's allocation of Duelguide's assets and liabilities is as follows:

|   |                 |
|---|-----------------|
| Shopping Centres                          | millions        |
| - Merry Hill (100%)                       | £877.0          |
| - Sprucefield (100%)                      | £75.0           |
| Development assets                        | £497.7          |
| <b>Total Assets</b>                       | <b>£1,449.7</b> |
| Borrowings and other liabilities          | £1,056.2        |
| <b>Westfield Group cash consideration</b> | <b>£393.5</b>   |

The assets allocated to the Westfield Group are currently subject to the usual cross guarantees associated with Duelguide's borrowings, including borrowings allocated to R&M. These encumbrances are expected to be removed on implementation of the aforementioned allocation and associated restructure. Pending this implementation the Westfield Group's interest in DGL has been accounted for under the equity method. The assets and liabilities underlying this equity investment are considered to be the specific Duelguide assets and liabilities that have been allocated directly to the Westfield Group.

Since 30 June 2005, a number of the abovementioned allocation and associated restructure transactions have commenced.

**INDEPENDENT AUDIT REPORT**  
to the Members of Westfield Holdings Limited

**Scope**

*The financial report and directors' responsibility*

The financial report comprises the balance sheet, income statement, cash flow statement, statement of changes in equity and accompanying notes to the financial statements for the consolidated entity comprising both Westfield Holdings Limited (the Company) and the entities it controlled during the period, and the directors' declaration for the Company, for the period ended 30 June 2005.

The directors of the Company are responsible for preparing a financial report that gives a true and fair view of the financial position and performance of the consolidated entity, and that complies with Accounting Standard AASB 134 "Interim Financial Reporting", in accordance with the *Corporations Act 2001*. This includes responsibility for the maintenance of adequate accounting records and internal controls that are designed to prevent and detect fraud and error, and for the accounting policies and accounting estimates inherent in the financial report.

*Audit approach*

We conducted an independent audit of the financial report in order to express an opinion on it to the members of the company and in order for the Company to lodge the financial report with the Australian Stock Exchange and the Australian Securities and Investments Commission. Our audit was conducted in accordance with Australian Auditing Standards in order to provide reasonable assurance as to whether the financial report is free of material misstatement. The nature of an audit is influenced by factors such as the use of professional judgement, selective testing, the inherent limitations of internal control, and the availability of persuasive rather than conclusive evidence. Therefore, an audit cannot guarantee that all material misstatements have been detected.

We performed procedures to assess whether in all material respects the financial report presents fairly, in accordance with the *Corporations Act 2001*, including compliance with Accounting Standard AASB 134 "Interim Financial Reporting", and other mandatory financial reporting requirements in Australia, a view which is consistent with our understanding of the consolidated entity's financial position, and of its performance as represented by the results of its operations and cash flows.

We formed our audit opinion on the basis of these procedures, which included:

- examining, on a test basis, information to provide evidence supporting the amounts and disclosures in the financial report, and
- assessing the appropriateness of the accounting policies and disclosures used and the reasonableness of significant accounting estimates made by the directors.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our audit was not designed to provide assurance on internal controls.

We performed procedures to assess whether the substance of business transactions was accurately reflected in the financial report. These and our other procedures did not include consideration or judgement of the appropriateness or reasonableness of the business plans or strategies adopted by the directors and management of the company.

**Independence**

We are independent of the Company, and have met the independence requirements of Australian professional ethical pronouncements and the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration a copy of which is included in the Directors' Report. In addition to our audit of the financial report, we were engaged to undertake other services. The provision of these services has not impaired our independence.

**Audit Opinion**

In our opinion, the financial report of the consolidated entity comprising Westfield Holdings Limited and the entities it controlled during the period is in accordance with:

(a) the *Corporations Act 2001*, including:

- giving a true and fair view of the financial position of the consolidated entity at 30 June 2005 and of its performance for the period ended on that date; and
- complying with Accounting Standard AASB 134 "Interim Financial Reporting" and the *Corporations Regulations 2001*; and

(b) other mandatory financial reporting requirements in Australia.

## **WESTFIELD GROUP IN DISCUSSIONS WITH FEDERATED DEPARTMENT STORES TO ACQUIRE STORE SITES SLATED FOR DIVESTITURE**

Federated Department Stores announced today that it intends to dispose of 68 stores as part of its US\$11 billion merger with The May Department Store Company. The list of stores targeted for divestiture by Federated includes 12 stores in The Westfield Group's US portfolio where there is overlap between Federated and May Co. (See attached) Westfield is in discussions with Federated for the acquisition of those stores.

"The discussions are at an initial stage and will take some time to complete," said Managing Director Mr Peter Lowy.

"If successful, the purchase of these stores would create the opportunity to further redevelop and improve our portfolio, as well as substantially increase our development pipeline in the United States."

The Federated/May Co. merger will create a company with nearly 1,000 department stores in the United States and is expected to close in the third quarter, pending completion of regulatory review. Westfield's US portfolio includes a total of 50 stores currently operated by the May Co. and 39 stores operated by Federated. As announced, it is expected that most of the May Co. stores retained by Federated will be converted to the Macy's nameplate following the merger.

EXERCISE OF OPTIONS**

We refer to the Appendix 3B in relation to the issue of 4,258 ordinary stapled securities (the "New Securities") lodged with the Exchange yesterday.

Please note that the Appendix 3B incorrectly provided that the New Securities would rank for distributions from 1 January 2005. The New Securities will rank for distributions from 1 July 2005.

An amended Appendix 3B is attached setting out the correct ranking provisions for the New Securities.

Yours faithfully
